

Training Cooks for the World's Best Fed Army

America prides itself on producing the best fed, best clothed, best equipped army in the world. Helping to maintain this standard are the schools for bakers and cooks. Left: At the Fort Sam Houston school students are learning to prepare coffee with a tripod and a Dixie Boiler. The men kneeling are heating dehydrated foods in their mess kits over the fire. Center: A student baker is adding shortening to other ingredients in the dough mixer. Bakers learn to operate movable and immovable equipment. Right: A typical doughboy samples the result of the school's training. Ninety per cent of the students who become expert cooks and bakers were not able to fry potatoes properly before entering training school.

Broken Jaws Can Now Chew Steak While Healing

Skeletal fixation of fractures of the mandible—that is the medical phrase for a new technique of setting broken jaws so that they can be used while healing. These pictures illustrating the method were made at a naval dental clinic. 1. After the X-ray shows the line of fracture a surgeon paints a line to indicate the position of the break. 2. A stout needle is screwed into the face. Three such pins are set in on both sides of the fracture line. 3. The pins are bridged by a strong steel rod which holds them tightly keeping the two parts of the jawbone together. 4. The patient, practically scarless, returns to his normal activities.

SMOKES and the SOLDIER

Is it true that a soldier is always hungry? Yes—up to a point. But the Quartermaster Department has found that some soldiers, particularly new recruits, actually don't eat enough. The Army mess table is exactly like a football team's training table. The food served there is carefully planned to aid in the physical development of the soldier. And the Army has discovered certain little ways to increase Johnny Doughboy's appetite. The Army has found it can add to a soldier's enjoyment of his food—and therefore increase his consumption of all those carefully prepared vitamins, minerals, and proteins—if he is allowed to smoke during meals. Measured tests run by the Quartermaster's Department show that food consumption actually increased by 8% when soldiers were permitted to smoke cigarettes at the mess table. "Smokes," of course, play a prominent part in many phases of the life of a soldier. Whenever you see a new photo of soldiers at ease, you're apt to see them enjoying a cigarette. Particularly among American troops overseas, cigarettes—real American cigarettes—are highly prized and almost never present in sufficient quantities. What kind of cigarettes do Uncle Sam's fighting men prefer? Well, records show that the favorite cigarette is Camel. That is true not only with men in the Army, but with Sailors, Marines, and Coast Guardsmen as well. Sales records from the service men's own stores—Post Exchange, Sales Commissaries, Ship's Service Stores, Ship's Stores, and Canteens—show that Camels are first with men in all branches of the service. Further proof that Uncle Sam's fighting men like their smokes is given in the service man's preference in gifts from home—it's a carton of his favorite brand of cigarettes. Tobacco dealers, recognizing that Camels are the favorite among service men, are equipped to help you in properly wrapping, addressing, and stamping your gift of Camels to the man in the service.—Adv.
