

Skirted Sailors

Enough officers and bluejackets to man a major task force including a battleship, two large aircraft carriers, two heavy cruisers and fifteen destroyers have been released to naval battle stations by women appointed for voluntary emergency service. So successful was the first year's experiment of utilizing women at naval shore posts that the navy intends to raise their number from 27,000 to 91,000 by the end of 1944. The success of their invasion into a service which was once strictly all male has greatly changed the navy's original plans regarding the women's reserve. Originally their activities were largely to be confined to office work but today they are manning control towers at airfields, serving at nerve centers of naval communications, restoring health to the wounded at

naval hospitals, packing parachutes, teaching blind flying, doing research work of all types and other vital work. They learn to work together with military snap and efficiency. To those who are ambitious there is always the opportunity for further education and more responsibility via officers' training schools. On the first birthday of the WAVES they were told by Admiral Ernest J. King, commander in chief U. S. fleet and chief of naval operations, that "the expectations of the navy in you have been justified by your hard work and sincere devotion to duty. You who are members of the women's reserve have won the respect

Victory Parade

of the naval service by your acceptance of military requirements, readiness for responsibility, an already valuable contribution to the work of winning the war."

PATTERNS SEWING CIRCLE

1847

Jolly Jumper

SUCH fun having this jumper with flaring skirt and jacket, whose pocket is designed to accommodate handkerchiefs, pencils, etc.

Barbara Bell Pattern No. 1847-B designed for sizes 6, 8, 10, 12 and 14 years. Size 8 jumper requires 2 yards 39-inch material; jacket 1 1/2 yards.

Flattering Frock

DISTINGUISHED frock to do you proud on many an occasion. Beautifully mending and a marvel for flattery. So colorful, too, when print-trimmed.

1800

Barbara Bell Pattern No. 1800-B designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires, with 3/4 sleeves, 4 1/2 yards 39-inch material; 1/2 yard contrast trimming.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

How to Line Casement Curtains; May Be Drawn as Shades at Night

QUAINT chintz curtains are always appropriate for casement windows and their colors give the best effect by day if they are lined to keep the light from shining through. At night they may be drawn together to serve instead of shades if the lining is of fairly heavy material.

The secret of making curtains of this type hang well is in not joining the two layers of material at the bottom. If your windows are narrow, a half width of chintz and of lining may be wide enough for each of the curtains. The lining should be cut one inch narrower and shorter than the chintz. Hem each piece, then place right sides together and stitch side seams, as shown at the right of this sketch. Crease sides with seams on the lining, then stitch across top. The lower sketch shows how the top is finished.

NOTE—Complete directions for making chair seat covers like those in today's

Prisoners of War

Of the some 6,500,000 prisoners of war now interned in 40-odd countries, about 5,000,000 are held by the Axis powers and only 1,500,000 by the Allied Nations, approximately 65 per cent of the latter number being Germans captured in Russia.

ASK ME ANOTHER?

A quiz with answers offering information on various subjects

The Questions

1. What is a campanile?
2. What name is given to an ornament worn as a charm against evil?
3. What kind of ship was the Constitution?
4. What is the approximate atmospheric pressure per square inch at sea level?
5. The whirlpool Charydis is off the coast of what island?
6. How high is Mexico City above sea level?

NEW EFFECTIVE HAY FEVER RELIEF

Hay fever, which annually causes more sneezes, more inflamed noses and more red, streaming eyes than any other scourge, may have its final big fling this September, all because a Pennsylvania electrical engineer was served a dish of corn meal mush which was entirely too salty.

The engineer, sneezing, and with all other hay fever manifestations, stopped at a hotel where he was served a dish of mush which he considered sending back as it was much too salty. Finally he ate it, however; the hay fever attack lessened, ultimately ceased. Next day he had three meals, all oversalted, and experienced his most comfortable time in years in the "hay fever season."

His analytical mind quickly grasped the possibility that the saline substance in his food was responsible for his relief. About this time, Dr. E. E. Selleck, a graduate of Columbia University, met the engineer, made notes, and when he returned to his home, began experiments. Today Dr. Selleck declares he has found a certain means of relief for hay fever and is supported in his contention by other medical experts, and a nationally known chemical manufacturing concern, the Hollings-Smith Company, at Orangeburg, New York, has taken over making the remedy, which is called Nakamo Bell.

Describing the experiments, Dr. Selleck said, "After I was sure I had found a means of quickly relieving hay fever through the chloride group, I tested it in the most practical way I knew. I held a three day clinic, to which many hay fever sufferers responded, from ages ranging from 10 to 60 years. Each person was given two tablets with a little water. Some relief came to all within ten minutes. Reports of these cases during the ensuing weeks showed practically a complete cessation of symptoms."—Adv.

7. In what year was the first woman elected to serve in congress?
8. What is the proper way for civilians to salute the flag during the pledge of allegiance?
9. What English nurse was executed by the Germans during World War I?
10. A person lying face downward is said to be what?

The Answers

1. A bell tower, especially one separated from a church.
2. Amulet.
3. Frigate.
4. A pressure of 14.7 pounds per square inch.
5. Sicily.
6. Mexico City is 7,415 feet above sea level.
7. In 1916 (Jeanette Rankin, Mont.).
8. Stand at attention, right hand over heart. Only persons in uniform need render the military salute.
9. Edith Cavell.
10. Prone.

Reflection Painting

A London artist has painted an odd miniature that can be seen only through reflection, says Collier's. Executed on a canvas about two feet square, the work is a jumble of form and color in the shape of a crescent.

But when it is flat on a table and a shining silver pillar, four inches high, is placed upon it, all the formless mass is reflected on the pillar as a perfect locket-size portrait of King George V.

SNAPPY FACTS ABOUT RUBBER

Experience shows that tire failures during the four hot months from June to September average 20 per cent higher than during the rest of the year.

Rubber sheeting should be washed with soap and warm water, thoroughly rinsed and then cleaned with a 5 per cent solution of cresol, to get the longest service out of the rubber. Roll, don't fold, when not in service.

The granddaddy of the present-day raincoat, the Macintosh, was patented in England in 1823 by Charles Macintosh, of Glasgow, Scotland.

Much More

THAN A BREAKFAST DISH!

Yes...for lunches, suppers, midnight snacks... Kellogg's Corn Flakes are a welcome standby for wartime meal planners. Popular with everyone, they save time, work, fuel, other foods.

The 'SELF-STARTER' Breakfast

Kellogg's CORN FLAKES

Kellogg's Corn Flakes are restored to WHOLE GRAIN NUTRITIVE VALUES of Thiamin (Vitamin B1), Nicotin and Iron.

IN THE ARMY

FOR STEADY PLEASURE—CAMELS HAVE GOT WHAT IT TAKES!

they say:
"CHEST HARDWARE" for medals
"NAPPY" for company barber
"WIND-JAMMER" for bugler
"CAMEL" for the favorite cigarette with men in the Army

FIRST IN THE SERVICE

YOU BET! CAN'T BEAT THAT CAMEL FLAVOR AND MILDNESS

Camel

The favorite cigarette with men in the Army, Navy, Marines, and Coast Guard is Camel. (Based on actual sales records.)

Photography

WAVE Anne Livesay was a photo-laboratory technician before joining the navy. She's doing the same work for Uncle Sam now.

Meteorology

Seaman Margaret Barnes at Anacostia, near Washington, D. C., checks the weather board which informs pilots as to the weather on their route.

Chemistry

Ensign Elizabeth Gerrard, formerly a research technician at Northwestern university, measures the amount of carbon dioxide in a gas at the naval medical center, Bethesda, Maryland.

Designing

Ensign Martha King works on a blue print. A graduate of the University of Michigan, she also investigates the effect of wind on airplane designs by using model planes in a wind tunnel.

Recreational facilities have not been forgotten. At the Great Lakes, Ill., station there are movies, happy hours, softball, sailing and near-by golf courses. The WAVE pushing the pencil is Constance Gorski.

Accounting
