

# Do you realize how much electric service increases your property values?

IF electric service were not available for your home, how much less would its market value be?

If you were buying a home would you pay as much for one where electric service could not be had?

Of all the advantages offered by your community to attract new industries an ample supply of electric power comes close at the head of the list. And what is the result of new industries? More people, more business, more prosperity and greater property values.

An ample supply of Electric Service Is Essential to the Life and Growth of Every Community. Large generating stations, interconnected with transmission lines, make such service available in nearly every community.
