Most of the school districts in the county were represented in the school exhibits at both the O'Neill and the Chambers Fairs. The exhibits at both places were large and the work was unusually well done. The premiums were quite evenly distributed among the districts of the county. THE HOLT COUNTY FAIR

HANDICAPPED BY COLD

The Holt County Fair came to a close last Friday. The last two days were cold and disagreeable, which reduced the attendance to the minimum.

RETIRED FARMER SAYS SARGON IS WONDERFUL

"I often think about the money and suffering I would have saved if I had known about the Sargon treatment when my health first began to fail."

"I have certainly had my share of suffering from rheumatism. The pain was so bad at times it looked like I couldn't stand it. About a year ago, my stomach got all out of order, too and bad spells used to keep me from my work for days at a time. I was so weak and run down that the least little exertion would completely ex-

Food Value...

THE scientist tells us that bread, because of its nutritive qualities and its low cost, may well be the foundation of the healthy diet, which should also include such foods as meat, fish, fruit, cereals, vegetables and dairy products.

Bread is a fundamental part of our daily diet. White bread, made with milk and yeast, furnishes the body with proteins of high quality which provide the necessary supply of nitrogen for the maintenance of metabolism. It is rich in carbohydrates, which furnish heat and energy, and, through the milk, supplies calcium, a mineral needed for the bones and teeth, and with yeast, is an important source of itamin B.

Bread is important because it furnishes necessary heat and energy for our bodies in easily digestible form and because it is the most economical source of these elements.

The above statement has been submitted to and approved by a group of world-famous investigators in the field of nutrition, selected by the editor of The Journal of the American Medical Association.

Grinds Snapped Corn, Kafir Heads, Ear Corn and All Small Grain!

LETZ SHUCK MILL

Here is the feed grinder you should have on your farm!

It not only handles ear corn and small grains, but grinds corn with shuck as well. The amazing capacity of the Letz and its sturdy construction, insuring long service, have made it extremely popular with stock feeders everywhere.

With the No. 210 Letz you can grind from 75 to 100 bushels of snapped corn per hour — pulverizing shuck and all into palatable, easily-digested feeds.

The No. 220 Letz, big brother to the No. 210, will grind a wagon load of 26 bushels in 12 to 20 minutes! The No. 220 is built oversize throughout in keeping with its bigger capacity.

All wearing parts on Letz Mills are built to give un-failing service for years. Plates are self-sharpening and self-aligning.

We honestly believe that the Letz No. 210 and No. 220 are the best shuck mills on the market today. Users find that they quickly pay for themselves in the greater feeding value of the ground feed.

Come in and take a look at the Letz Shuck Mills next time you're in town.
