**MRS. WALTERS COULD HARDLY WALK AT TIMES**

"After all Sargon did for me at my age, I don't see how it could fail to benefit others.

"For the past twelve years, it seemed like everything I ate would

sour on my stomach and form gas that almost cut off my breath. I had weak, dizzy spells and suffered so with rheumatism, I could hardly walk. My color wasn't good and I was continually having to take something for constipation.  
"It's marvelous what seven bottles of Sargon did for me! I've gotten rid of all that gas bloating and indigestion, and eat anything I want. I no longer suffer from dizziness and every rheumatic pain I had is gone. I'm so much stronger I go anywhere I please without tiring.  
"Sargon Soft Mass Pills regulated me perfectly and I can see their good effects on my liver by the wonderful way my complexion cleared up. Everybody says I look like a different person."—Mrs. Alice Walters, 209 4th St., Council Bluffs, Chas. E. Stout, Agent.

**Digestible**

TESTS by the United States Department of Agriculture covering a ten year period prove that the proteins and carbohydrates of bread made from white flour are more completely digested and absorbed by the body than those made either from whole wheat or graham flour.

The digestibility of white bread, added to its palatability and its low cost per unit of energy, make it the foundation of a balanced diet, which should also contain other cereal foods, fruits, vegetables, meat and fish, dairy and poultry products.

White bread furnishes the human body with carbohydrates that create heat and energy; made with milk it furnishes the very necessary calcium for bone and teeth development and with yeast, contributes to the Vitamin B requirement for preventing some of the deficiency diseases.

Bread is a healthful component of our daily diet.

The above statement has been submitted to and approved by a group of world-famous investigators in the field of nutrition, selected by the editor of The Journal of the American Medical Ass'n.
