MAIL RIFLERS SENT TO JAIL

Federal Judge at Omaha Gives Light Penalties to Two Young Men

OMAHA, NEB.—(UP)—For what is believed to be the first time in history of federal courts, persons robbing United States mails were let off with a jail sentence here

In sentencing Melvin H. Leonard and Joseph Donaldson, of Gibbon, Neb., to four months each in jail, Federal Judge J. W. Woodrough expressed the opinion that this was the first time in history that persons convicted of mail theft escaped heavy penitentiary terms.

Donaldson and Leonard had pleaded guilty to rifling mail pouches in the Union Pacific depot at Shelton, Neb., where Leonard

was employed as night agent.

Their scheme was to purchase jewelry in adjacent cities ordering it shipped to Donaldson in the mails. Leonard had made a key which opened mail rags. When the pouches reached Shelton he would extract Donaldson's package and the latter would put in a claim for insurance. In this manner they had collected a total of \$356 from the government.

Whether it will be necessary to have a court order to pay out any money under this appropriation. Whether all depositors entitled to

a refund should be pro-rated their share of the appropriation should prove insufficient, or whether as many as possible will be paid in full. Whether the checking out of old money from one depositor's account in one bank operated by the guaranty fund commission and deposited to the same depositor's account in another bank operated by the commission constitutes a new de-

TITLE TO HIS **FARM CLEARED**

Thurston County Case Finally Disposed of By Nebraska High Court

LINCOLN, NEB. - (Special) -Ernest Quesner won in supreme court in his effort to clear the title of his farm in Thurston county, in a suit wherein A. R. Oleson, Cuming county attorney, sought to enforce a \$10,000 mortgage he secured from the former owner, Bernard Praest. Praest began a suit in 1921 to cancel a mortgage Quesner had on the property. Oleson was his lawyer. Failure of the clerk to notify Quesner overruling of a special appearance, resulted in a default judgment being entered against him. He had this set aside later, but in the meantime the Oleson mortgage was filed of record. Quesner did not find this out till seven years later. Meanwhile he bought the property in at foreclosure sale and paid off an insurance company mortgage for \$25,000.

The court said that the best it could do for Oleson would be to give him a fourth lien and the privilege of paying off all the others ahead of him, which total double what the land is worth. It says that it is evident that the \$10,000 mortgage represented a contingent fee that he never earned because he did not succeed in getting the Quesner mortgage cancelled. In any event it cannot be allowed to cloud the title.

EXPLAINS SYSTEM OF LISTING BANK PAPER

OMAHA-(UP)-How the banking department has changed its system of classifying notes held by state banks in order to give a clear and vivid picture of the bank's condition, was described here by George Woods, state bank commissioner, at the convention of the Nebraska's Bankers association.

Since May 1, 1929, there have been 18 failed state banks reorganized and re-opened under the banking law passed by the last legislature. The re-organization of several other banks is well advanced and future re-openings are anticipated, Woods reported.

Instead of the old classification of bank notes under the four heads of good, slow, doubtful and worthless, the present plan provides for classes A, B, C, D and E. Class A notes are self-liquidating notes which will not be renewed and notes of certain payment at matur-

Class B are sound notes secured by satisfactory collateral or based upon figancial statement showing ample liquid assets. Class B borrowers are able to pay their notes at maturity but they may renew them or increase the amount, Woods explained. Class C are capital loans which under normal conditions may be collected in installments or part. payments at regular renewal periods. The payment of such notes can not be immediately demanded without serious injury

to the borrower. Capital loans based upon insufficient security or none at all compose Class D, and Woods advised that these be divided into two parts. -the amount secured and collectable, and the amount on which there will be probable loss.
