"What do You Mean . . . Penetrates Metal Surfaces?"

A Plain Answer to a Reasonable Question

THE Germ Essence, imparted to highly refined paraffin base crude under a patented process exclusively owned by the Continental Oil Company for North America, actually penetrates and combines with metal surfaces, forming a permanent, protective film.

No matter how long a motor stands idle or how cold it gets, this film is present and immediately lubricates the moving parts when the engine turns over.

It takes five to ten minutes—often longer—for the oil in the crankcase to fully flood the bearings in the starting operation. During this period, automotive engineers agree, from 40% to 60% of motor wear occurs. This wear is reduced to a minimum by the ready-and-waiting lubrication which the Germ Essence imparts to CONOCO Germ-Processed Motor Oils, retaining it on and in the surface pores.

CONOCO Germ-Processed Motor Oil stands up under every condition of stress and strain. It will not break down or burn nor will it evaporate to any appreciable degree.

No other oil possesses these qualities.

So positive are we in our convictions, so positive have been our tests of this remarkable lubricant, that we are perfectly willing for you to select any operating condition—no matter how extreme—and we will meet it with CONOCO Germ-Processed Motor Oil so satisfactorily that you will never consider using any other oil.

Go now to stations and dealers displaying the CONOCO Red Triangle—have your crankcase drained and begin immediately to profit through the use of this remarkable oil.
