

# Here's what the Frigidaire HYDRATOR does

You can put celery in wilted ... like this

Actual photograph of stalk of wilted celery before being placed in the Hydrator. This celery is tough, unpalatable, useless.

... And take it out crisp ... like this!

The same celery as it came from the Hydrator the following morning. The magic action of the Hydrator has restored the celery to its original state—fresh, crisp, and delicious.

Now all household Frigidaires are equipped with the Hydrator. And when you see what it does you'll be amazed. You'll wonder how such a simple device can perform such magic. For the Hydrator not only keeps vegetables fresh but actually makes wilted vegetables crisp again.

Look at the pictures showing tests made with celery. The one at the left shows a bunch of wilted celery. Note how the stalks droop ... how badly they're wilted.

Now look at the photograph on the right. This shows the same bunch of celery the following morning ... just as it came from the Frigidaire Hydrator.

And, of course, what the Hydrator does with celery it also does with other vegetables. It makes them crisp, firm and delicious ... gives you an important added service offered only by Frigidaire.
