Belsky's Annual Sale of Herefords

At ranch 6 miles west of Merriman, Nebraska, on Highway No. 20

Tuesday, October 14, 1930

55 BULLS, 38 coming 2 years old, 17 coming 1 year old. 60 Females, 22 young Bred Cows and 2 year old bred Heifers. 20 yearling open face Heifers and 18 Heifer Calves.

Lunch Served at 11 A. M., Sale following immediately after.

With the exception of a few of the older bulls the entire offering will be presented in range condition and owing to the number to be sold most of them will be put up in bunches of uniformity in type and breeding and sold with privilege.

The offering as a whole is of a high standard, descending principally from Anxiety 4th, the bull that is responsible for the Hereford today holding its strong position, commercial or purebred, due to its performance on the ranges. Were it not for this great sire, the tide might have gone to one of the other two beef breeds. Anxiety 4th gave to the Hereford breed the hind quarter, compactness, smoothness and thickness of flesh, a short, broad head with a flat, drooping horn and most of all the ability to transmit these characteristics through his descendants, which is credited to his being line bred. His most noted direct descendants of later days are Beau Mischief, Beau Blanchard, Bright Stanway, Spartan, Prince Domino, etc. Bright Stanway and Spartan are both half brothers to Prince Domino, who is now noted as the greatest sire of all time of any beef breed, making his first identity for producing pounds on the range of the ideal feeder type. The above families are strongly represented, some being line bred Prince Dominos and all bred females are mated with Prince Domino bred sires. To us this means a mark of quality and an assurance of breeding performance, which is our aim in our breeding operations. However, we do not wish it to be understood that we are pedigree fadists for we consider individuality first.

Catalog will be cheerfully sent on request and your presence appreciated sale day.

It's wonderful how the frost held off so long; some of us have potatoes as green as if it was in August, and others have dug theirs and find more than they thought they would have.

The rain Saturday helped the rye fields some as well as other things, but it doesn't look very good for the trees, as they seem to bud. An early hard freeze will be hard on the coming year's fruit crop.
