

Garfield Tea

Was Your Grandmother's Remedy
For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

FOAM OF MILK FED TO CALVES

Experiments Show Practice Does Not Affect Growth of Animals

Brookings, S. D. — That milk foam fed to calves does not affect their growth or physical condition in any way is the conclusion drawn from a 5½ months' test by the South Dakota State college dairy husbandry department. "The experiment was undertaken," said I. M. Olson, head of the department, "because of the rather widespread idea that feeding milk with foam on it to young calves hindered their growth and gave them the scours. No record could be found of any such experiment having been made previously. To check results, the experiment will be repeated, more complete data will be available.

The six calves used in the test were taken from the college dairy herd, some of them Holstein, one a Jersey and one or two cross breeds. They were from three to four weeks old when the test was started. Three were fed skim milk with all foam taken off, while the other three were fed skim milk with the foam which accumulated in separating, plus the foam taken from the other milk. In separating, the milk pails were lowered from the machine so that considerable foam was formed.

Each of the six calves was fed the same amount of milk by weight. At the start each received six pounds. Later the ration was increased to eight pounds and finally to 10. From four to six inches of foam stood on the pails of milk fed to three of the calves. All were given grain and hay in the customary amounts.

Every 10 days of the trial all the calves were weighed and each 30 days they were measured. Frequently, Mr. Olson said, visitors came to see the calves and attempted to pick out the ones being fed foam. In no case were they able to distinguish between those getting foam and those getting milk without foam, he said.

DIVERSIFIED PHILOSOPHY.
The ducks are winging south just now. But that don't mean a thing to lame ones down in Washington. For they abide till spring.

If eolpuss would come back, He was so short and so slow, Some guy could make a lot of jack Inventing peewee polo.

The Indian was dumb, may be, But yet he made a summer That neither roasts a man to death, Nor makes him call a plumber.

The hibernating animal, Did nature plan it for, Example to that crusty gent, The building janitor?

Securities now give the lie To Webster's definition; And they have acted, too, to smash A G. O. P. tradition.

'Commissioner!' in Washington. A man called down the street; Full forty men came rushing up, The calling man to greet.

S. D. "Tax Reform."
From Sioux Falls Argus-Leader. The official report of the South Dakota Tax conference is now being distributed. Among the things it contains is a copy of a proposed income tax bill. After reading its provisions and noticing the widespread ramifications of a tax of this nature, one is forced to the conclusion that the less South Dakota has to do with the plan the better.

An income tax may serve with some degree of satisfaction in States where large incomes are much more numerous than they are in South Dakota. South Dakota is a State of comparatively small incomes. Our average income rates fairly well but it is not sufficiently large to produce much revenue under the usual income tax returns. The work and bother, however, of figuring, assessing and paying an income tax is about the same whether the total be small or large.

Imposition of an income tax upon the people of South Dakota would produce another extremely distasteful governmental burden. And its benefits are extremely questionable. The promoters of the tax promise a reduction in property taxes if the income tax is adopted. But what do the records show? North Dakota has an income tax, put over under the same guise being employed here. The taxpayers were told that it would cut the burden on real estate. But it didn't do that. North Dakota taxpayers are now paying the regular property tax as usual—in truth, it's been increased—and in addition thereto are required to cough up an income tax. If the income tax were put to a vote of the people in North Dakota after their experience with it, one may be pretty certain that they'd reject it by a large majority.

Political promoters of the income tax in South Dakota are advised to be careful if they have much regard for their future. Their promises of a cut in real estate taxes are not likely to materialize and the resentment of the people will be displayed in the voting places at the first opportunity.

Q. Has the Nile many tributaries near its mouth? L. K.

A. The lower Nile for 600 miles has scarcely a tributary rivulet.

Out Our Way

"Spirit of Wichita"

One attraction which the recent Wichita, Kan., National Livestock show hadn't heralded came in the birth of a potential champion calf, called "The Spirit of Wichita," in the Guernsey herd of Harvey S. Firestone, the magnate. The calf's mother is the famous Carnation Josephine Ollie. His aunt, Hoesley Fobes Homestead, holds the world's record for twice-a-day milking. Fannie Cronye is shown with the calf.

Millions in Loans to Farmers Will Be Asked in Congress To Relieve Stricken Areas

BY FRANK I. WELLER,
Associated Press Farm Editor, Washington — Emergencies rather than partisan issues seem likely to occupy attention of farm leaders in the short session of Congress beginning December 1.

This is indicated by the offer of democratic floor leaders in both houses to co-operate with republicans for the speedy return of better times for agriculture and industry.

Three farm measures are outstanding—creation of a federal feed, seed and fertilizer loan; appropriation of funds to aid stricken farmers even to the extent of buying food for them, and passage of the agricultural appropriation bill for 1932.

Each involves innumerable items, questions of expediency and policy—so much so that ardent advocates of the export debenture, reform of the agricultural marketing act and further regulation of cotton and grain exchanges may be able to crowd no more than preliminary consideration in the three months left to the 72nd Congress.

More Road Money in Sight
The agricultural appropriation bill increases federal highway aid from \$75,000,000 to \$125,000,000, and Secretary Hyde is preparing to ask Congress, when the bill is passed, to make the 1932 appropriation for road work available in 1931.

It is his purpose to minimize unemployment by speeding up state road building programs, especially in the drought areas.

Due largely to the increased highway fund, the agricultural ap-

Women Need Work, Too.
From New York Telegram. In the panicky attempt to meet at the last minute the unemployment problem, which should have been mitigated by orderly advance planning, some desperate measures are being proposed. One of these is the demand that employers fire women workers and give their jobs to men.

The theory is that men are family bread winners, while women are holding jobs to make pin money or for the fun of it. That theory does not fit the facts. For better or for worse, millions of women have been drawn into the

Arterial Highways of Future Radiant Vision

To the Romans a road was a means to an end. Straight as a string, built with uncompromising zeal over all obstacles; streams, marshes, mountains, other men's property, and the numerous other irregularities which lie in the path of material logic, your Roman road was designed to "get there."

The superhighways which our latter day road builders are advocating have no such simple duty. They are to be the nourishing arteries of our entire economic system, employing thousands of laborers in their construction and upkeep, stimulating hundreds of wayside industries.

There is something fantastic in the vision of America rolling joyously along the broad highways from Maine to California, bypassing the cities, hurdling the mountains, skimming the plains, consuming sandwiches and gasoline, and keeping business humming by wear and tear on apparatus.

They say—or they used to—that a hundred persons are involved in the natural life of one needle from its birth in the mine to its interment in a crack in the floor. Think of the millions involved in the eternal life of these superhighways. The conception becomes staggering under the added thought of the five-day week releasing carloads of customers over the week-end. People spend twice as much on holidays as they do on workdays.—Providence Bulletin.

England Adopts System of Illness Insurance

Insurance against illness is familiar to all in England.

All the schemes—actual or projected—under which a person pays a regular subscription to a hospital, and in return is entitled to receive treatment at that hospital, free of charge, if he requires it, fall into this category. And now there is an interesting extension of the illness insurance principle for which doctors themselves are responsible.

This is a voluntary contract system, under which subscribers pay a fee of three pence a week (six cents), which goes to the doctor in full. In return for this weekly fee, the subscriber is "entitled to medical and surgical treatment within the competence and skill of a general practitioner at the surgery or at his house, including all needful medicines."

According to the Lancet, the famous medical paper, there are 30 or so services of this kind in various parts of the country.—London Answers.

Animal's "Tail" Looked Decidedly Out of Place

Phil Buecher has seen three summers, although it must be admitted he doesn't remember much of the first two. But right now he is keeping his father and mother, Jasper, and his grandfather and grandmother, Stewart, on the alert to answer his scores of questions. Recently Phil was visiting in Evansville and there saw an elephant for the first time. The elephant was eating hay and Phil was all eyes, for it was the strangest creature he had ever seen. "Look, mamma," he finally exclaimed, "he's eating with his tail on the front end."—Indianapolis News.

Selling the World

Two of the leading dairy countries in Europe are excellent markets for American condensed milk. For years the United States has supplied hungry Germans with pretzels and wieners. We also export enormous quantities of cosmetics to France, and millions of dollars worth of textiles to England.—Collier's Weekly.

Death may love a shining mark—but shining marks are scarce.

What A Woman 39 YEARS OLD Should Weigh

You May Be Getting Fat

If your weight and height matches the figures below—you have a good normal, free from fat figure and don't have to worry—Weigh yourself today—

Ages 35 to 39	
4 Ft. 11 In.	122 Pounds
5 Ft. 0 In.	124 "
5 Ft. 1 In.	126 "
5 Ft. 2 In.	129 "
5 Ft. 3 In.	132 "
5 Ft. 4 In.	136 "
5 Ft. 5 In.	140 "
5 Ft. 6 In.	144 "
5 Ft. 7 In.	148 "
5 Ft. 8 In.	152 "
5 Ft. 9 In.	156 "
5 Ft. 10 In.	159 "

Weights given include ordinary indoor clothing.

If you are overweight cut out pies, pastries and candy for 4 weeks—then weigh yourself again—go light on potatoes, rice, butter, cream and sugar—eat lean meat, chicken, fish, salads, green vegetables and fruit.

Take one-half teaspoon of Kruschen Salts in a glass of hot water every morning before breakfast—This is the easy, safe and sensible way to take off fat—an 85 cent bottle lasts 4 weeks—Get Kruschen Salts at any drug store in the world—You'll be gloriously alive, vigorous and vivacious in 4 weeks.—Adv.

PROMOTES HEALING HANFORD'S Balsam of Myrrh

New Crop Table Rice. Fresh from the fields. 100 pounds beautiful clean white rice. In double sacks. \$2.75. ED CABANISS, Box 400, Katy, Texas.

HOG FORMULA
Kills Worms, Prevents Flu and Cholera. Mail one dollar bill to PRICE KOETHE P. O. Box 667, Cedar Rapids, Iowa.

LIFE AND DEATH

No human being can afford to be without these new facts of life that will never know successful contradiction. It describes death from experience, and gives an exact description of the human soul. An ideal Christmas Gift. By mail only. 160 pages cloth bound. \$1.00. HICKS PUBLISHING CO. Dept. B, 857 Eighth St., San Diego, Calif.

Sunshine

—All Winter Long

At the Foremost Desert Resort of the West—marvelous climate—warm sunny days—clear starlit nights—dry invigorating air—splendid roads—gorgeous mountain scenes—finest hotels—the ideal winter home. Write Cree & Chaffey

PALM SPRINGS California

Sioux City Ptg. Co., No. 51-1930.

Enjoys It While He Can
"You are a funny fellow. You used to go out every evening, and now your wife is away you stay in every day."

"I should be foolish to go out now I have the opportunity of being married in the house."—Berlin Dorfbarbier.

John D.'s Tribute to Health

Without health one can do nothing. Health is a blessing that transcends all earthly things. The man with nothing but good health is rich compared with the man of wealth who has lost his health.—John D. Rockefeller in Collier's Weekly.

Old folks used to stay at home and hope for a mild winter. Now, they go to Florida or California.

For Older Women

MRS. CLARA RILEY
2100 Paxton & 4th Ave., Sioux City, Iowa

MRS. BERTHA STEPHENS
21 E. Ross St., Lancaster, Pennsylvania

"I began to take Lydia E. Pinkham's Vegetable Compound at Change of Life. Now I take it every spring and fall and it keeps me in good health. I am able to take care of an eight-room house and garden at the age of 71 years. I will praise the Vegetable Compound wherever I go for it is a wonderful medicine for women. They should give it a good trial by taking about five bottles."—Mrs. Clara Riley.

"I was very nervous and rundown and weighed less than one hundred pounds. I felt tired and weak and I often had to lie down. I took Lydia E. Pinkham's Vegetable Compound because I read the advertisement in the paper. Now I eat well, sleep well, and have good color. In fact, I couldn't feel any better and I weigh one hundred fifty-five pounds. I am glad to answer letters from any woman who wants to know more about the Vegetable Compound."—Mrs. Bertha Stephens.
