O'NEILL NEEDS A NEW FIRE TRUCK AND PUMPER

At the city election on April 7th there will be submitted to the voters a proposition to vote \$7,000 in bonds of the City, to be used in the purchase of a new fire truck and other fire fighting equipment.

The present truck is obsolete. It is tainly outlived its usefulness. Many times recently when a fire alarm was sounded, it took considerable time to get it started. At any time it may may cost several times the expense of a new truck. If a new truck is authorized, the old one can be used as an auxiliary instead of the present hand-drawn hose cart.

One of the most serious handicaps the fire department finds in fighting will present a three-act operetta, a fire is the lack of sufficient water "The Belle of Barcelona," at the K. pressure. trailer whenever I have a bulky load."

miles.

ly increases the danger to them by smoke, falling walls and other hazards. O'Neill has been fortunate in not having many dangerous fires, but this luck will not hold forever, and one serious fire will cost far more than the cost of preparing to fight it. The principal item in preventing loss by fire is by having sufficient up-todate equipment to fight fires. there is no better protection than truck equipped with a pumper which will furnish sufficient water at any fire if the water is in the mains.

The fire department asks the vot ers to consider this matter seriously because no one can tell where th first serious fire may occur and who will have the loss. A vote in favor of these bonds is a vote to protect your own property. The fire department nearly twelve years old and has cer- feels that the matter of the obsolete condition of the fire department equipment should be called to the attention of the public, who must bear the loss if any is sustained by reason of the department being unable to lay in reaching a fire, and the delay get the equipment to a fire.
