• • Blending makes it better

In the test kitchen of a great master-chef creates the blend of ingredients to produce the perfect soup. In a scent-laden room in a corner of France an expert blender of perfume invokes his highest genius that our sense of smell may be gratified. In a work-room fragrant with the aroma of many types of coffee beans, a highly-paid specialist concentrates his energies that we may be provided with a coffee blend to please our palates. Whether it's soup or soap, tobacco or tea, music or mustard... blending is vital to the production of the best of each. Equally as vital, if not first in importance, is the knowledge and genius of the blender. He must know how.

The best gasoline, too, is blended. In the processes of a modern refinery three types of gasoline are produced. They are, Natural Gasoline, Straight-run Gasoline, and Cracked Gasoline. Each possesses certain desirable qualities necessary for perfect motor operation... but... no one of them possesses all these wanted characteristics.

So CONOCO Gasoline is a blend of the three. There is Natural Gasoline, to give quick starting. There is Straight-run Gasoline, to give power and long-mileage. There is Cracked Gasoline, with its desirable anti-knock quality. Just as carefully as the perfume blender at his delicate task, CONOCO refiners have developed their balanced blend of these three ingredients. There is the gift of knowing how to merge the qualities of the three gasolines to create a balanced, triple-test fuel. One brand of coffee outells all others because of the expertness of its blender. And so, with CONOCO Balanced-Blend Gasoline, the skill of the blender accounts for the popularity of the product. Stop today at the sign of the CONOCO Red Triangle and have your gas tank filled with this better motor fuel.
