

Yes, Thank You, We're Doing Well

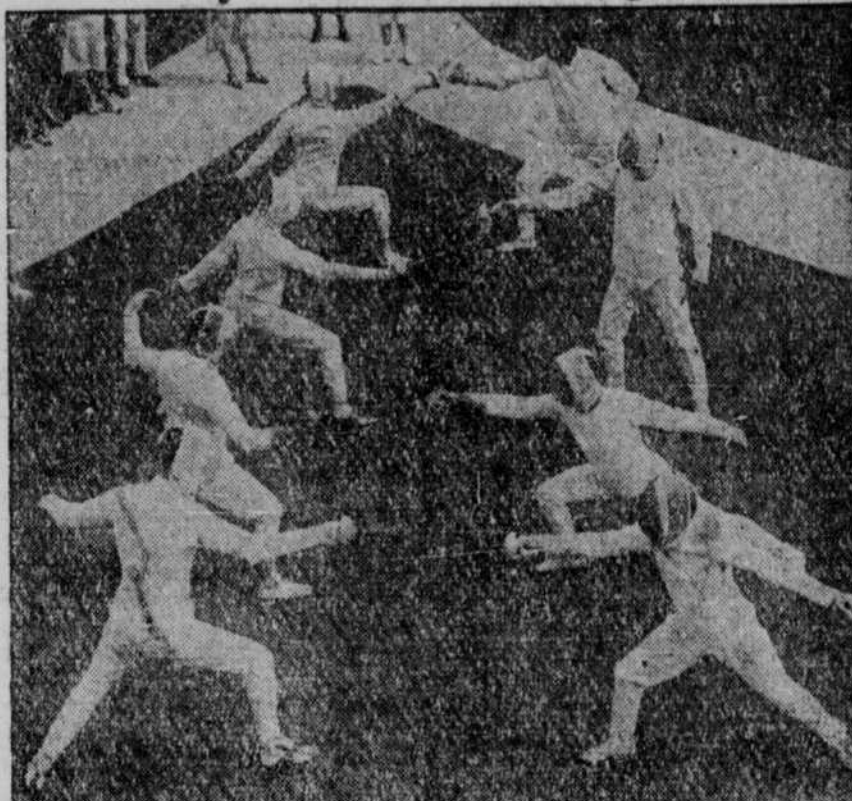

Extra! Four young ladies reveal their age! Who said young girls are reticent about giving their true ages? Here are four of them letting the whole world know that they're one year old—and proud of it. They're all sisters, yes, sir! So by now you've probably guessed that Edna A., Wilma B., Sarah C. and Helen Morlock, of Lansing, Ill., are quadruplets, the only ones alive in these United States. They are shown in their four passenger perambulator on first birthday. They're already hard to tell apart.

Wins—Then Loses

Loretta Turnbull (above), of Monrovia, Cal., is going to stick to Yankee craft, and more particularly her own, when she intends to win boat races. That conclusion was reached on the Riviera recently when on one day, piloting her own speedy craft, she handily won an outboard motorboat race, only to go down to defeat a few days later when she borrowed a Spanish boat. There's quite a difference between first and sixth places.

A Very Pointed Argument

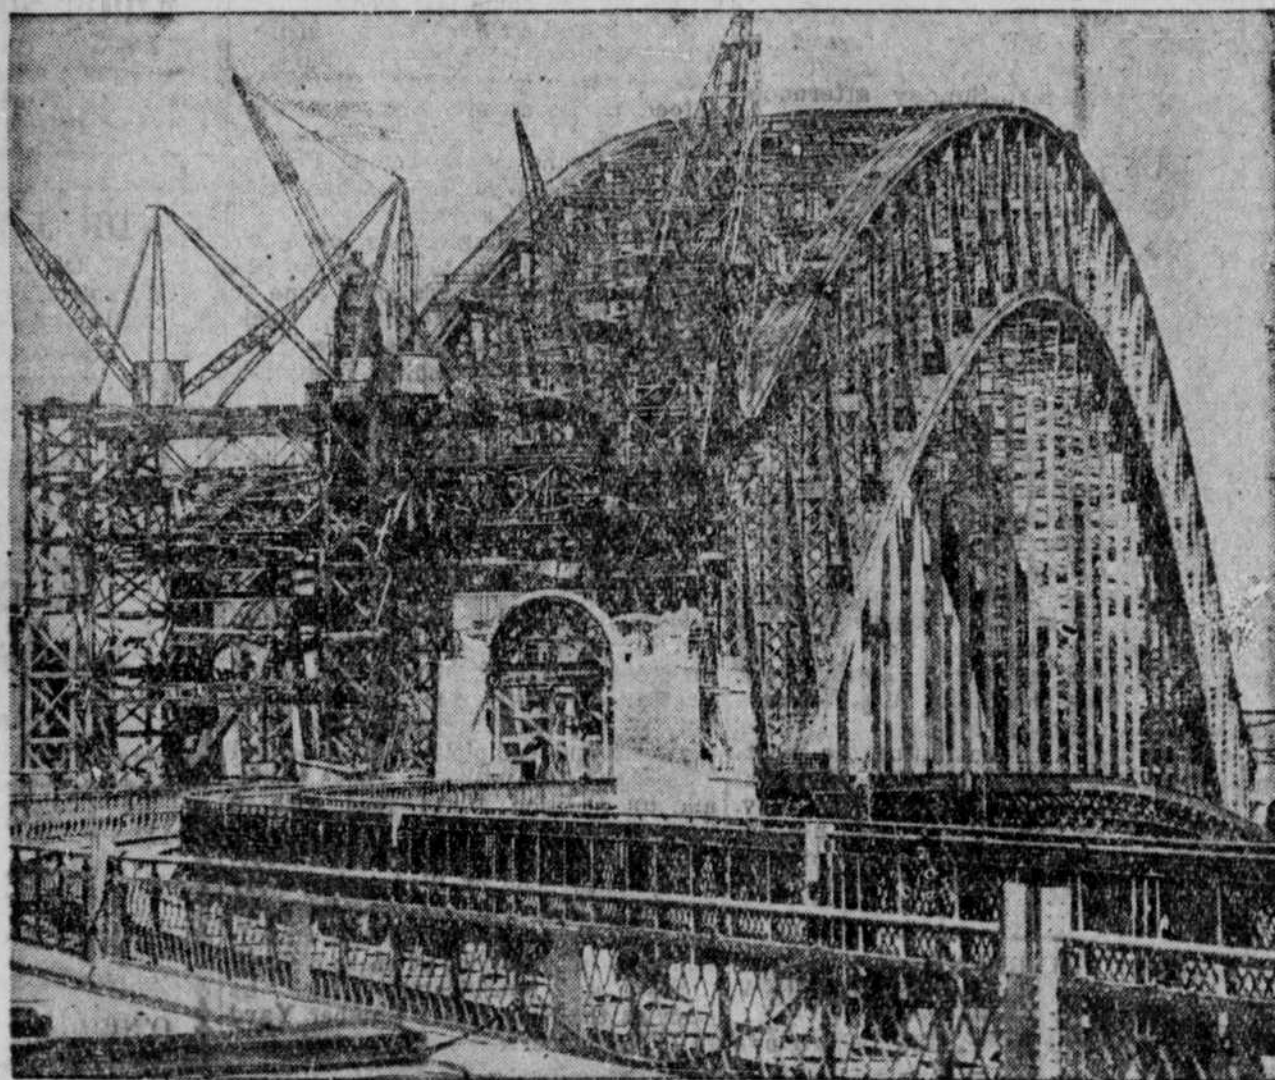

The gentlemen above, who were so immersed in their sharp argument as to be unaware of the camera, were the finalists in the three-weapon fencing contest for Southern California honors. Eagerly each one strives to make his adversary see the point, for the winners may get a chance to strut their stuff in the Olympic games competition to be held in Los Angeles in 1932.

History Repeats Itself

Washington's historic crossing of the Delaware was re-enacted, as shown above, by American soldiers the other day, but instead of the frail boats which the first President and his men had to use, and without the additional hazard of drifting ice, the twentieth century doughboys laid and rolled pontoon bridges to test their strength. This picture shows a pontoon load of men, machine guns, horses and mules crossing the Delaware. If only Washington could have seen it—and marveled.

Triumph of Man's Engineering Genius

Extending across the harbor in Sidney, Australia, this gigantic steel arc is called the longest single span bridge in the world. This unique closeup shows the tremendously complicated structure with its countless rivetings, a picture of strength and grace that compels admiration for the minds and hands that created such a marvelous bit of engineering.

For the Briny

Charmingly displayed by Lillian Bond, screen star, this modernistic patterned bathing suit is carried out in harmonious color combinations. The blending of light and dark green in the above model gives a pleasing effect.

Who Could Ask for More?

Here's convincing proof of the point that the well-advertised weather is not the only asset in California. One might even be pardoned for saying that the beautiful maiden so alluringly draped by the sea-shore should be what every fully equipped beach needs to ensure lasting popularity. What the wild waves must be whispering to lovely Leila Hyams, M-G-M movie actress, can't be far removed from "Let's get together." You can't blame them, can you?

Helps Untie Bonds Honeymooners

Probably the most prominent attorney now practicing in Reno is George A. Bartlett (above), former District Court Judge of Washoe County, Nev. He has rendered decisions on divorces for twelve years and recently expressed his views on divorce in a book entitled "Men, Women and Conflict." Now he acts as an attorney.

Lillian Roth, stage and screen star, and William Scott, her new husband. They were married after a romance that took in almost every part of the country. Lillian is a New York girl and her husband is the son of a Pittsburgh millionaire.

Achievement!

Depicting the spirit of achievement, this symbolic figure in nickel will surmount the entrance to the new Waldorf-Astoria Hotel in New York. It is the work of Miss Nina Saemunderson, Icelandic sculptress, shown with the statue, who is well known in America for her busts of celebrities.

Up and Over She Goes

Pittsburgh society got quite a thrill when Mrs. Simon Patterson (shown above), took this hurdle with her favorite mount. For, if she had missed, the story might have been quite different, climaxed by a sad ending. But she made it—easy. And gracefully, too, do you notice?

Yes, Thanks, I Feel Better

May we introduce to you one winsome pup who answers to the monicker of Sparky? Having just been given such a dose of medical science that the surgeons were literally up to their ears in microbes recovering a baby's rubber nipple which Sparky inopportunely swallowed, the fluffy-haired pup is now ready to take a new lease on life. But he's certain of one thing—he isn't going to steal any more milk from babies. It doesn't pay.

Harnessed River

Credited with taking a leading part in developing Niagara Falls power and many other great projects, Edward Dean Adams, one of America's greatest engineers, is shown above in one of his most recent photos. Adams was eighty-five and was active up to his death at his home in New York.
