Sister Mary's Kitchen

The June bride who is doing her first marketing usually finds it somewhat puzzling to know how much food to provide for two persons.

As far as recipes are concerned, cooking for two reduces itself to a mathematical problem. Most recipes in current cook-books are calculated to serve six persons.

The size of the cooking utensils is of far more importance than most people realize. The larger the surface exposed to heat the more rapid the evaporation.

When Buying Vegetables Some vegetables are confusing, for it is hard to know how much must be allowed for waste in preparing for cooking.

One-half pound green beans will serve two persons generously. One pound fresh spinach will serve two persons.

Vegetables like beets, corn and carrots must be chosen in regard to size. One large beet or carrot is considered enough for the average serving, but if the vegetables are small, two or three will be needed.

SELF SERVE GOES HAYWIRE

My dealer had his seed armoire on a convenient shelf. So I walked up and picked mine out.

I didn't have my glasses on. So went by pictures shown Upon the paper packages—

From that I sowed for lettuce seed, Has grown a plant, to me A changeling in my garden bed.

It's "endive," so the package says, In which I bought the seed; But otherwise I'd surely think It some new fangled weed.

And now will someone tell me, please, For I am up a tree— If I should eat it raw or cooked, Or brew it into tea.

OLD COPPER COIN LEADS TO HIS CONFESSION

Omaha, Neb.—An old-fashioned one-cent piece, such as Uncle Sam once loaded into the pockets of young America, led to the confession by Jack Baker of Omaha.

Stock was sold in Nebraska City in the Rawlings Fuel-less Motor corporation, formed with about 200 stockholders.
