John C. Gallagher, Clerk.

With so many New Deal Sir Galahads blaming the monopolies for the new "recession," why doesn't somebody think to enforce the anti-trust laws?

We regret to say that a young mother of Atchison was about to put her baby into scalding water when her husband interfered. The mother had just read the following in a baby book: "If fresh milk does not agree with the baby, boil it."

—Atchison, Kans., Globe.

Your share of **TELEPHONE TAXES** has **INCREASED 50% in 2 years**

Taxes of this Company have increased 50 per cent since 1935. This means that the part of your telephone bill which goes for taxes is about one-half more than it was two years ago.

The cost of providing telephone service is increasing. Labor and material costs as well as taxes are substantially higher now than a few years ago. Charges for telephone service have not been increased to meet the increased costs. Total revenues of this Company in 1937 were about 5 per cent less than in 1930.

Through improvements in equipment and methods of operation, we are doing everything we can to offset increasing taxes, wages and material costs and provide satisfactory service at present charges.
