

### Ice Tears Away Niagara Falls Bridge

This twisted mass of steel girders among mountainous blocks of ice is all that remains of the 40-year-old Falls View International bridge which collapsed into the ice-filled gorge below Niagara falls after resisting an ice jam for 24 hours. This view of the collapsed "honeymoon bridge" was made from the American side. The noise of the crash of the 4,500,000-pound structure blotted out for a moment the roar of Niagara falls, 500 yards upstream. Thousands of spectators watched as the girders buckled. Workmen who had been sent into the gorge to strengthen the bridge's supports narrowly escaped death when the crash came.
