## Melvin Ruzicka Attends Omaha Gamble Meeting

Melvin Ruzicka, managing partner of the local Gamble store, returned this week from the annual two day convention of Gamble Store managers and Gamble Agency Store owners which was held February 14 and 15 at the Fontenelle hotel in Omaha.

This meeting brought together managers and agency owners from this entire territory and is one of seven similar meetings held throughout the north and middle west during the month of February at Chicago, Omaha, Bismark, Denver, Billings, Montana, Pacatello, Idaho and Minneapolis, Minn. These meetings are held each year for the purpose of reviewing past year's activities and discussing new ideas, plans and methods of operation for the coming year. Representatives of the general office of Gamble Stores from Minneapolis were present. They included R. C. Teuscher, F. F. Dreblov, C. T. Gibson, L. D. Nelson, C. C. Ragust, Bert Gamble, Phil Skogmo, M. O. Weiby, W. I. Meline, L. W. Johnson, C. L. Feldtkeller, A. J. Reiber and G. P. Castner.

During the course of the meetings the activities for this year were reviewed and new plans outlined for expansion and merchandising for 1938. These plans will include not only the expansion in the number of Gamble Stores, but also a continued expansion in the number of individually owned Gamble Agency Stores. Plans were laid also for the modernizing of store interiors, store fixtures, lighting systems, and the enlargement of many present store locations.

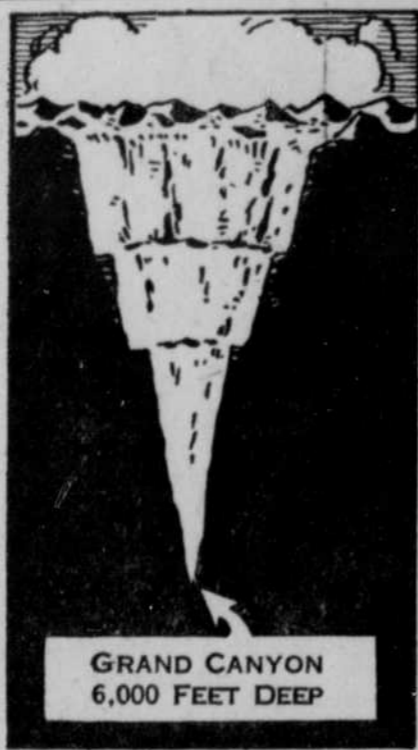

This convention is the 13th annual meeting of the organization since the first Gamble store was opened in St. Cloud, in 1925. At that time only automobile supplies and accessories were handled. The organization was an outgrowth of the parts department of the automobile business in which B. C. Gamble and P. W. Skogmo, founders of the company were engaged in 1925.

From this small beginning the company has grown to its present size of 261 Gamble Stores and Associate Gamble Stores and 1378 individually owned Gamble Agency Stores. Merchandise lines have been enlarged considerably until now they include radios, electrical

appliances, washing machines, hardware, sporting goods, paint, etc. The company has also recently developed a mail order department, business of which has greatly increased during the past year. In addition to this, a line of cosmetics has been added to many stores as well as a complete stock of furniture and home furnishings. Gamble outlets now operate throughout the entire middlewestern and northwestern states, reaching almost to the Pacific coast on the west, Ohio on the east, the Canadian border on the north, and Kansas and Missouri on the south. Mr. Gamble and Mr. Skogmo, founders of the company, report very satisfactory progress during the past year. A considerable increase was shown in both wholesale and retail sales during 1937. Sales of some major appliances were increased materially with electric refrigerators showing a large increase. The introduction of the new Coronado Water Flex Washer, the washer without an agitator, helped to increase washing machine sales over 1936. The founders of the company also report that present indications make the business outlook for 1938 as being favorable. They base this opinion on the fact that sales for the month of January of 1938 were very satisfactory, showing a substantial increase over sales for the same month a year ago.

## THE WORLD'S DEEPEST OIL WELL

GRAND CANYON  
6,000 FEET DEEP

The Continental Oil Company has just completed drilling the world's deepest oil well, the Kern No. 2-A, near Wasco, Kern county, Calif., to 13,400 feet—more than two and a half miles—and the most distant point to which man has ever penetrated Mother Earth. In the column at the extreme right are shown the names, ages, and depths of the three major subsurface formations penetrated by the Continental drilling crew. In the left hand column at the right are shown the depths at which oil and gas were encountered. The artist's drawing above compares the depth of this California oil well with the depth of the Grand Canyon. The

well was drilled by one of Continental's own drilling crews.

nor Earle wants the government to take over the anthracite mines because he thinks the operators are regimenting mining, curbing competition and controlling prices. The rarest jewel of all, these days, is consistency.

The bloodiest and cruelest wars in history have been civil wars, which cannot be prevented by international agreement. The present struggle in Spain is a good example.

Now might be a good time for Mr. Roosevelt to suggest to each of us that we stop for a moment and consider whether we are not better off today than we were a year ago.
