TIPS to Gardeners

More Combinations

CROP combination is useful with vegetables such as tomatoes, melons or corn, as well as with "small garden" crops like radishes, lettuce and carrots which require comparatively less space.

The following combinations are suggested by Harold Coulter, vegetable expert of the Ferry Seed Institute:

Sow dwarf peas early in rows four to six feet apart; plant radish between rows of peas, and plant one row of cucumbers between every two rows of peas.

Set cauliflower early in rows two feet apart; one foot on each side of each cauliflower row plant spinach; sow radishes between spinach rows. When radishes are used set tomato plants in the space thus vacated. Peppers or egg plant may be substituted for tomatoes.

Sow early turnips in rows three to four feet apart; later plant a row of corn between the turnip rows.

Give ground ample supplies of fertilizer when combined cropping is practised extensively.

LINEAGE LONGER THAN A KING'S!

For 80 years, generation after generation of flower and vegetable seeds have been grown and gradually perfected by the unique Ferry-Morse Seed-Breeding Institute. Some have twenty generations behind them—for it takes time to produce prize-winning strains.

Each year, before Ferry's Seeds are packeted, the same Institute tests them all for growing ability—and grows and analyzes each variety for truthfulness to type.

Only seeds that have passed their tests appear in the familiar Ferry's Seeds store display. Choose your seeds there—and be sure of a fine garden this year! 5c a packet and up. 1938 NOVELTIES too! Ferry-Morse Seed Co., Detroit, San Francisco.
