it is believed that as a result fewer of these pictures will appear on the screen.

Improper Mailing

The division of dead letters and dead parcel post held a sale in the postoffice building here Wednesday. A great room was filled with all kinds of merchandise which never reached its destination and was sold to the highest bidders. Postal employees in charge of this sale said that most of this mail was lost because the senders failed to address the letters and parcels properly or they failed to put on their return address. Even old coins and valuable stamps which collectors misdirected were sold.

This is not the only dead letter and dead parcel post sale the government holds. New York holds these sales every month and similar sales are held in half a dozen other cities of the country.

Add Another Bureau

The House added another bureau to the many now in the government. This is the Civil Aeronautics Authority to provide for the regulation of civil aeronautics. Nobody was opposed to the principal contained in the legislation which passed but the minority which asked to recommit the bill, felt that instead of adding this new bureau it could be worked into the Interstate Commerce Commission which deals with all other interstate transportation. By doing that the minority felt a new and expensive bureau could be saved to the taxpayers. The majority, however, argued that the I. C. C. now is overworked and can't handle its present business and they outvoted the minority on the motion to recommit the bill.

Air Mail Got There All Right

Air mail letters sent from various towns in the Third district to the district office in Washington made fast time. Most of the air mail letters commemorating Air Mail Week were stamped 9 a. m. May 19 in the Nebraska towns and reached the congressional office in Washington at 8 a. m. the following day, May 20. Many of the senders requested that they be returned to them indicated that there are many stamp collectors in the district.

BRIEFLY STATED

Mrs. Fanny Gallagher left Friday morning for Sioux City where

she will spend a few weeks visiting at the home of her daughter, Mrs. Neil Ryan.

ENGINES WILL BE WORN LESS THIS SUMMER

But you want to know exactly why. You're leery of general statements that won't save you one piston ring or one quart of oil.

So you want what the doctors call a specific.

And that's what you get from your change to OIL-PLATING.

Only patented Conoco Germ Processed oil from Your Mileage Merchant's station can give your engine OIL-PLATING.

Other oils can't. No matter how they're refined they cannot surpass the correct refining of Germ Processed oil. But refining only takes things out, while Germ Processing adds in the patented man-made substance that forces oil to "join up" with the working parts, keeping them OIL-PLATED. All the while Germ Processed oil is used, you have permanent OIL-PLATING. Like all plating, OIL-PLATING keeps wear away and it never drains down nor waits for the oil pump! Before other oils could even begin to circulate, OIL-PLATING will lubricate! Hence no "dry starts" with your engine OIL-PLATED. And platings don't fly off at Summer speeds, or frizzle away in the heat. So the heat indicator stays on the safe side, and the gauge-stick says "Still full of Conoco Germ Processed oil!" Have your Mileage Merchant OIL-PLATE Your Engine. Continental Oil Co.

Arbuthnot & Reka Service Station

Oil Plating with Conoco Germ Processed Motor Oil
