John G. Kennedy, one of the pioneers of the Page section of the county and a Frontier reader since the establishment of the paper, was in the city Wednesday and was a pleasant caller at this office. In talking of the days that are gone he said three important events in his life came on the same day, September 27. On that date 51 years ago he was married; his son Harley was born on that date twelve years later; September 27, 1938, a eleven and a half pound daughter was born to Mr. and Mrs. Harley Kennedy at their home near Page. Mr. Kennedy is firmly impressed with the idea that September 27 is his lucky day and he has many reasons for believing so.

**NATIONAL AFFAIRS**  
 By Frank P. Litschert  
 There is much speculation today among the doctors of the nation, as well as others who are greatly concerned over the socialistic trend in the United States from a government angle, as to what will pop up at the National Health Conference which it is understood the President has called for a future date.  
 If the speculations of many are correct, the National Health Conference will be turned into a bedlam of controversy over the question of socialization of medicine. That speculation is based on action of organized socialization promoters in the past. It is evident that every major move toward socialization of trade and profession in the past has been preceded with a propaganda scheme that has been well planned and timed. Conferences, court battles and investigations have all preceded planned legislative attempts. These battles furnishing material for propaganda to the public for the purpose of creating a public psychology in favor of legislative action.  
 Many physicians may not realize it, but the socialization of medicine squad in our country is exceedingly busy at this time. For months specialists of the socialist brand have been visiting Russia studying the communist medical regimentation scheme. They have been writing books, articles for newspapers and magazines and addressing large audiences in various parts of the country on their return. They have been doing some very effective propaganda among the so-called "downtrodden," making them believe that the doctors of our nation are but a group of hardboiled capitalists who help compose a part of the "capitalist system of exploiters of the proletariat" and that the socialization of medicine will bring the workers "free" medical care. Anything free these days goes over with a bang. It is the age of suckers.

In New York and other large industrial centers certain communist and socialist agencies are holding nightly mass meetings on the subject. Their speakers are advertised as "delegates to the National Health Conference." They are doing some very damaging work against the medical profession of our land. One of these campaigns is being promoted by the strongest and most powerfully financed agencies of the communist forces, one that has a large paid membership and is closely knitted together because of its fraternal, sick and death benefit plan. It has its own medical corps for its large membership over the country and of course would like to put these on the federal payrolls if possible and relieve the costs of the service, so as to turn those funds into other avenues of the communists' destruction campaign.  
 Social workers, many of them, are also doing their bit for socialization of medicine. They see in it the creation of a larger field for social workers.  
 Socialization of medicine opens

another avenue, too, and that is an avenue for more governmental regimentation of the home. For years there has been a drive on to put the government into the home through a maternity and child welfare act. This has been defeated in the past by joint church and medical force, but with socialization so hotly to the forefront as it is today, many are asking whether the unorganized public can longer stand their ground against the well organized regimenters.  
 J. S. Fry, of Columbus, Ohio, a former resident of this county who has been here visiting the past two weeks, is now firmly convinced that there are some honest people in the country. When he left his home city for a visit here he purchased a ticket from a bus line in Columbus for the entire journey. When he reached Chicago he discovered that he had lost his ticket and had to purchase another with which to continue his journey, figuring that the former ticket was gone forever. To his pleasant surprise he received a letter the first of the week from the Bus line that his ticket had been found in their garage in Chicago and they enclosed him a check for \$24.80 the balance of transportation due on the ticket.

**SURRENDER**  
 The President's declaration that he would be pleased to see a liberal Republican defeat a conservative Democrat does not necessarily mean that our Noble Leader is trying to start a third party. But it certainly does indicate that he should sand his tracks for wheels are slipping as a party purger. It was evident six months ago that President Roosevelt expected to hammer all of the widely varying minorities who voted for him in 1936 into one Democratic majority. He expected after election to hammer the old South; the city Tammanies, the silkstocking Democrats, the John

Lewis labor radicals, the Negroes, the farmers and the ore-eyed liberals, into one political unit which should have his mind and obey his will—a sort of self-made mandate! It is almost certain that he has failed. It is obvious that he cannot either reward his friends in the primaries or punish his enemies there. He has tried. He has advertised his trials. His failures are becoming conspicuous.—Emporia Gazette.  
 Mrs. R. L. Arbutnot, Mrs. Margaret Stannard and Miss Evelyn Stannard left Tuesday morning for Omaha where they will visit for a few days.
