Motor Experts say "OLD-TYPE OILS WON'T DO" Lubricants... formerly recommended... now found deficient for modern motors. The California Company answers with a new KIND of oil, the 1939 "RPM"—built for today's operating conditions.

MOTOR EXPERTS are facing problems today that oils, once favored in spite of higher prices, cannot answer. These experts report that modern motors, with their new metals and new metal finishes, close-fitting parts, tiny openings for oil flow, high compressions, high speeds, and high temperatures, punish oil as never before. That brings up a brand-new problem! Varnish may form, sticky at first and soon baking to a hard film. Pistons and piston rings stick. Oil grooves clog. Friction increases. Motor drag develops. Engines are hard to start. They lose power and consume extra gasoline. But not with the new 1939 "RPM"! This NEW KIND of oil—which gives all the long mileage you ever found in any oil—also has new qualities that keep it clean and keep your engine clean under the punishment of today's operating conditions. Try "RPM" today!

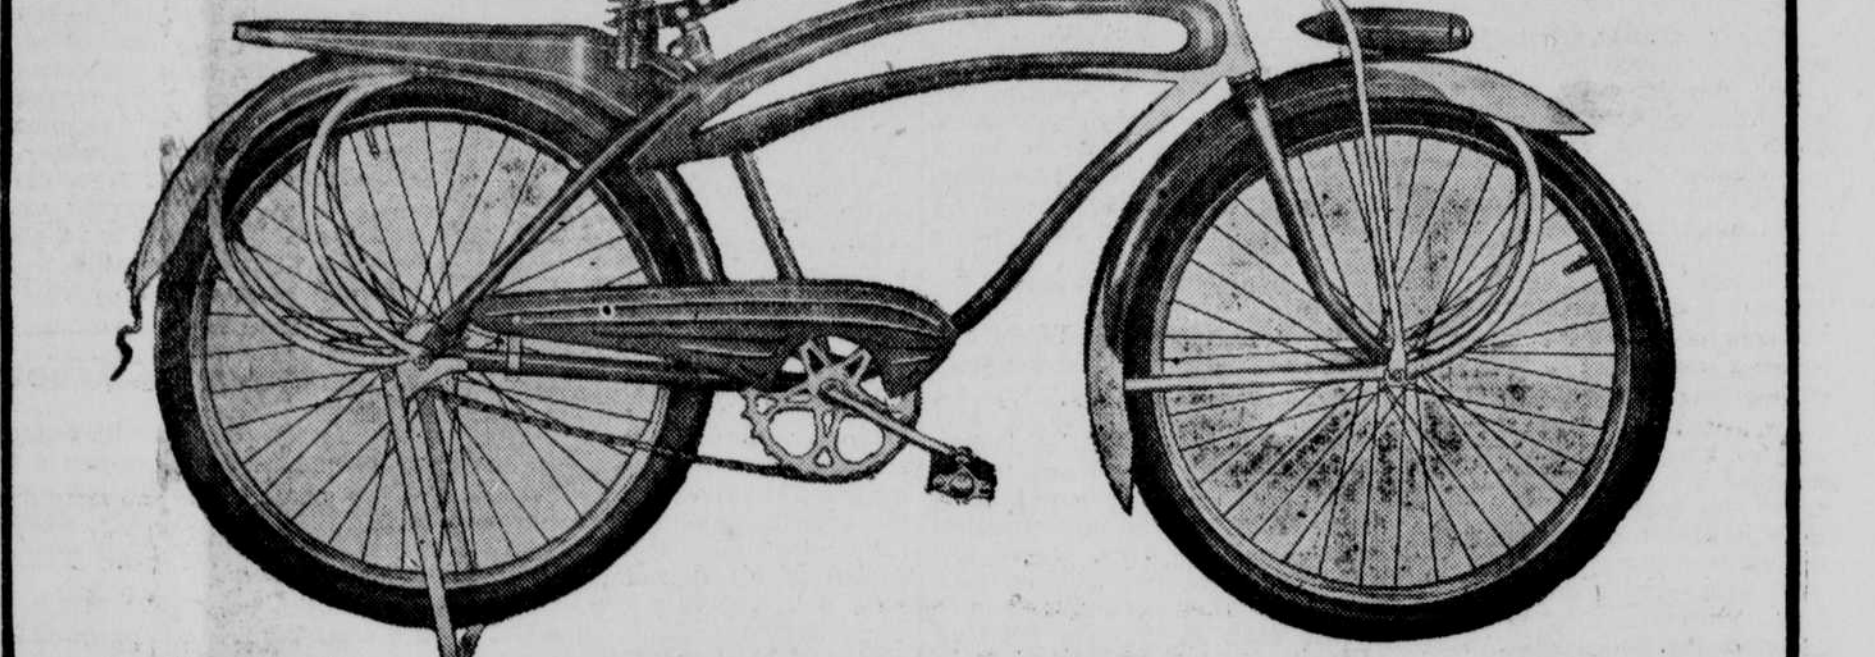

WE BREAK A TRADITION By tradition, all of our advertising is conservative—it understates the merits of the products advertised. Because a new kind of motor oil is so necessary today and because this NEW KIND of motor oil, "RPM", is so clearly superior to any old-type oil, we're going to do it full justice—but no more than justice—by saying to you—"RPM" is TODAY'S NO. 1 MOTOR OIL "BUY"!
