SHIELDS

Sunday, May 21, all the residents of the three adjoining school districts decided to take an afternoon off and have a real community celebration. What could be more delightful than a picnic in a grove on a pleasant May day with all the parents and young folks taking part in competitive games. The gloom fades and you can not help smiling at some of the antics displayed by some of those young students, and even the older ones as if along as the strawberry shortcake holds out.

An intelligent and well selected committee had charge of affairs and they are to be congratulated on their success. At 2:30 a nicely balanced and very delicious lunch was served. Miss Margaret Early and Mrs. Joe Bruder furnished all the free ice cream we could eat, I mean while it lasted, as twenty gallons don't last long when the hungry Eagleites gather as they did last Sunday.

During the day we met many of the real old timers who lived here in the early days and were familiar with the hardships of the early times as well as the successes in the early eighties. They were raised in a different atmosphere than what we have today. They were taught that the way to get out of debt or economic depression was to save money; to economize, to cut down expenses. We never did it. With the Merry-Go-Round we have today a regular spendthrift system. But a lot of us farmers still vote for this system. E.S.E.

The Weather

In the state during the first of the week, due to lack of moisture, the soil dried rapidly and there was a rapid deterioration in condition of winter wheat and small grains in general, as well as meadows and pranges. Winter wheat suffered and the possible yield was considerably reduced by continued dry weather. Conditions were much improved the latter part of the week over most of the state by rains, which were quite general. Average this week, 0.80, average since April 1, 2.76, for state in general.

Total precipitation for May, 1.43 inches. Total precipitation since January 1, 5.22 inches.

Home Demonstration Convention at Fremont

The Nebraska Home Demonstration Council will have its annual meeting at Fremont, June 8, 9 and 10, will find Mrs. Vern Sagesor, of Amelia, and Mrs. L. O. Johnson, of O'Neill, representing Holt county as official delegates. Others will be attending from Holt county to take part in the three day convention of women from all over Nebraska.

The program will include two outstanding homemaking authorities from Washington. They are Miss Mary Rokahr and Mrs. Lydia Ann Lynde. Both are with the Extension Service in the United States Department of Agriculture.

Sorghum Meetings Are Proving Popular

A series of sorghum meetings in Holt county reveal that a vastly increased acreage of forage and grain sorghum in 1939 is now being forecast for Holt county. Decent weather conditions in the past few weeks have caused more and more farmers to increase their planting intentions.

In attempting to answer the scores of questions of farmers concerning grain and forage sorghum production, Gilbert Webster, Agricultural Extension Agronomist, pointed out some recommendations which are based on experimental work both at the Nebraska experiment station and in local tests. He pointed out that most farmers were aware that the food value was nearly as valuable as corn.

In view of what has been learned these recommendations are found to be the best practices:

- 1.—Don't plant until the soil is thoroughly warmed up.
- 2.—Treat all sorghums for smut. Use copper carbonate at the rate of 3 ounces to the bushel. Proper treatment is practically 100% effective in controlling the disease.
- 3.—Plant adapted grain sorghums, sooner milo and early kalo, at the rate of 2 to 4 pounds of good seed per acre; and forage sorghums, looti, atlas and black amber at the rate of 4 to 6 pounds per acre in rows.
- 4.—Be sure to plant adapted varieties. You can get the latest information from your County Agricultural Agent.
