As to mental telepathy, they lay it on the line, but they're still working on the prophecy business. They started the latter inquiry in April last year. -----

For the last year, knowing observers of European war and politics have warned the world to keep a sharp eye on Col. Gen. Walther von Brauch-

German army. His tracks usually lead in the direction of the next German lunge, and, controlling the army, he makes as well as executes decisions. General Von Brauchitsch is a member of an old east Prussian feudal family, a conservative by instinct, education and tradition, but politically malleable. A distinguished officer in the World war, he hated the republic, but went along with it, alienating his stiff-necked Junker colleagues, and became head of its armed forces. From 1922 to 1932. he delivered many scholarly denunciations of bolshevism, but, perhaps more than any other one man, put through the interchange of

officers, technicians, fabricated goods, munitions and raw materials between Germany and Russia during this decade. Weighty opinion from the oth-

er side is that General Von Brauchitsch, rather than Hitler, Goering or Rosenberg, schemed the Russo-German deal and forced it to a conclusion through his unquestioned hold on the army.

To him is also attributed the plan, the decision, the timing and the start of the drive into Poland. In several instances there have been indications of hostility between the general and Goering, with the betting on the former, if it ever comes to an open break. The general was born in Berlin in 1881 and has been in the army since his early youth. He is handsome, imposing and brilliantly educated, within the limits of the old army caste, and has employed power in a manner to make him an ace exhibit in Dr. Rauschning's "revolution of nihilism."
