Any oil-change helps "youthify" your engine...but not like this change to OIL-PLATING

You change to an OIL-PLATED engine by changing to Conoco Germ Processed oil—patented. It goes in like any oil and is priced as low as many. But a costly extra ingredient—created in the laboratory—technically described in the Patent Office—energizes this oil to couple up direct to inner engine surfaces. The connection is as close as that of any plating on your car. A plating is not in the habit of getting wiped away at speed, or of draining down at a standstill, and so that all goes for OIL-PLATING.

Then no matter how long the car stands or runs with Germ Processed oil in the crankcase, the OIL-PLATING still stays up to its topmost point in each cylinder—fastened up to its job when fluid oil-film couldn't be. You get a great fluid oil-film, mind you, with Germ Processed oil, but in addition you get OIL-PLATING... drain-proof... a fixed defense against the strong assaults of Summer wear. Helping to keep up your engine, OIL-PLATING helps to keep up the level of your Germ Processed oil. Even in an older engine its economy may remind you of "the first year." Change—to Your Mileage Merchant's Conoco station—today. Continental Oil Company
