

The Washington-Merry-Go-Round —

John L.'s Retirement Is Hinted Due to Circulatory Ailment Affecting Heart

(Editor's Note: While Drew Pearson is on vacation, the Washington Merry-Go-Round is being written by his old partner, Robert S. Allen.)

Lewis May Retire

John L. Lewis' intimates are whispering a startling report about him.

They say he is seriously considering retiring as president of the United Mine Workers at the union's October 2 convention in Cincinnati, O.

Poor health is given as Lewis' reason. The 68-year-old miner czar has had a number of sick spells in the last few years. He is suffering from a circulatory ailment that affects the heart. The past two months Lewis was in seclusion at a Montana health resort, on the advice of his doctors.

If Lewis steps down, he will do so at the peak of his power and with his union larger and more prosperous than at any time in its stormy history. Miners are drawing more pay than ever before, receive bigger pensions, and the UMW treasury bulges with more than 10 million dollars in government securities.

In the event Lewis quits, his successor will be UMW Vice President Tom Kennedy. Short, quiet-mannered, soft-spoken and friendly, he is the direct antithesis to the turbulent and melodramatic Lewis. But the two men are very close.

Lewis' retirement plan, according to intimates, does not include complete separation from the UMW. He will retain an active hold on its affairs.

Campaign Bombshell

President Truman is quietly nursing a bombshell he will detonate during his western campaign tour.

It will be the announcement that a number of reclamation projects will have to be shut down because the GOP-controlled congress failed to provide sufficient funds. Top among these projects are Boyesen in Wyoming, Heart river and Angostura in the Dakotas. The president will charge this is another example of congressional disregard of public welfare.

More Fuels Assured

The outlook is very promising for more fuels this coming winter than last.

Barring some unexpected upset, the supply of coal, oil and natural gas will be from 10 to 20 percent greater than last winter. Certain sections may encounter shortages but the country generally will have enough winter fuels to meet normal needs.

Of the three major fuels, coal is in best supply. Reserve stocks are now so ample that restrictions on foreign export were removed September 1. Fuel oil output is now 10 per cent above that of last year—an increase slightly above the expansion in use of this fuel. Also, reserve stocks are considerably ahead of 1947.

If everyone uses restraint, there will be enough fuels for all this winter.

Biting the Hand

The Greek government doesn't like the salaries the U. S. is paying its Greek aid mission officials.

This money comes from U. S. taxpayers, the same as the remainder of the 500 million dollars the U. S. is pouring in to Greece for recovery and military purposes.

Also, the two toughest problems confronting aid officials are to try to get the Greek government to impose a just tax on its wealthy classes and to lop off thousands of drones on the government payroll.

Best-Selling Diary

The U. S. government is profiting very handsomely from the diary of the late and unlamented Joseph Goebbels, Nazi propaganda minister. To date, the publication has netted the alien property custodian over \$300,000.

Found by a German in Berlin's rubble, the manuscript was initially traded for 16 cartons of cigarettes.

For a while, it looked like the lucky American publisher would make a big killing from book, magazine and newspaper syndication sales. But Asst. Atty. Gen. David Bazelon stepped in and claimed the work as U. S. property. It has been paying off to the U. S. treasury since.
