# It's a boy!

Good news, indeed—and you want it to travel fast. So get on the phone quick . . . call the baby's grandparents, call everybody! It's worth a lot to have a telephone at a time like this . . . how much is for you to decide.

KEEPING THE LINES OPEN—paying our people, buying and installing equipment—takes more money than ever before. We have to cover these costs with what you pay us for service. We have to do all these things—and still make a reasonable profit. Because that's what investors eye before they put savings into a business.

The fair price to you then is the one which allows us a reasonable profit . . . one which will attract the millions of investment dollars needed for improvement and expansion.
