**A TIP FROM KROTTER'S**

- As we read the papers and listen to the radio we know that the steel strike is on and that they say it will probably last until January. If it does last until January, it will be at least nine months before supply will be back up to normal.
- Many factories have already closed down due to the lack of steel.
- With the price of steel and labor as it is and prospects of it being higher, machinery prices cannot be lower, so why wait? Buy the machinery you are going to need now while it is still available.
