OPA ISSUES WARNIGN TO USED CAR DEALERS

Dealers who have not filed an application and wish to continue to sell used cars, trucks or motor cycles at "warranted" prices were warned Thursday by the District OPA Office in Sioux City that their applications must be in the District Office by August 1, 1945.

If the applications are not received at once, it stated, it may be several days after the effective date before the "Authorization to Sell" is returned.

These application forms may be obtained from any rationing board in the Sioux City District. To protect the public who purchase motor vehicles at "warranted" prices, all dealers are required to furnish their authorization number on each transfer issued, OPA said.

Good Storage Needed For Fat Preservation

Fats and oils become rancid if stored where light, air, moisture or heat can affect them. To keep fat fresh, melt it, pack it down firmly in a tightly covered container such as a tin can or an opaque jar, and store it in a dark, cool place. Fats and oils also absorb odors readily, so keep them away from strong-flavored foods. Fats that contain bits of meat, meat juices, or other proteins are likely to spoil rapidly. For this reason use promptly meat drippings, fat skimmed from gravy or soups, and butter.

Many fats can be saved and used again. Fat for deep-fat frying can be used a number of times if it is not overheated, and if, after using, it is strained through several thicknesses of cheesecloth or other clean white cloth. Keep it in a cool place.

Take care never to burn fat! Smoking is the signal that the fat is beginning to break down; fat that has smoked gives food an unpleasant and disagreeable flavor and rapidly becomes rancid. Do not put fresh drippings into a can containing old fat that may have become a little rancid, as the fresh fat will acquire the rancid flavor, warns the New York State college of home economics.
