It was the first time in 2,000 years of Japanese history that a mikado had left the royal palace to be received by a foreigner. Emperor Hirohito, "The Son of Heaven," was dressed in formal morning attire, not in his flamboyant dress of admiral or marshal. The conquered ruler bowed to American correspondents.

SNAPPY FACTS
about
RUBBER

Although the Germans manufactured and used synthetic rubber in volume long before America, a general superiority of the American synthetic rubber over the German product has been established by technologists.

To obtain enough rubber to make a tire for a low-priced car, two rubber trees must be tapped for a whole year.

Longer, more uniform tire life, constant goal of tire manufacturers, is now being achieved through use of a new type of synthetic rubber developed by B. F. Goodrich.

Steering wheels of post-war cars may be cushioned with a covering of synthetic rubber.
