Delores Albers returned to school Wednesday, after nearly

Master-Mind

... Keeps Your Electricity Flowing Constantly and Dependably

THROUGHOUT Nebraska you will find these master control boards . . . or "master minds," as they might rightfully be called . . . a vital part of your Consumers state-wide network which assures you of constantly reliable electricity.

Much as the instrument panel of an airplane tells the pilot that all is well, these "master minds" are your assurance that dependable electricity is flowing surely and steadily when and where it is needed.

This state-wide interconnected system of transmission lines and power facilities, owned and operated by the people, has made possible the utilization of Nebraska's vast power facilities and water resources for the sole benefit of Nebraskans. And in so doing, it has made the mass production and distribution of low-cost electricity a reality.

This means greater savings and additional benefits for the communities served by Your Consumers Public Power District. It means greater convenience and prosperity for Nebraska's homes, farms and industries.

YOU SHOULD KNOW THESE FACTS

1. Your Consumers Public Power District is owned and controlled exclusively by the people of Nebraska.
2. Entirely self-supporting, Your Consumers gives you and other Nebraskans the additional benefits of efficient non-profit operation.
3. The efficient state-wide group operation of Your Consumers Public Power District makes available an abundance of dependable, low-cost electricity which makes possible greater progress and prosperity for each community it serves.

two weeks of illness.
