SNAPPY FACTS about RUBBER

The 24 million American passenger automobiles that survived the war need 50 million new tires, according to Government estimates. New passenger tires will continue to be all-synthetic for some time to come. It takes 450 rubber trees and two men a year, working full time, to produce a ton of natural rubber. The work of inscribing names on headstones has been made easier by development of a rubber sandblast stencil sheet. The first commercial application of B. F. Goodrich Company's "Toralastic" rubber spring is in 1,000 twin-coach buses to be produced this year.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
