To the People of this Community

You've celebrated V-E Day and V-J Day but how about V-I Day? While you were buying extra bonds to equip and back our

fighting forces, you also were eating down the threat of runaway living costs at home. The record of your part in fighting

inflation speaks for itself in this report to you by Ted R. Gamble, National Director of the Treasury's War Finance Division. Says he: "Americans invested in war bonds two-thirds of every excess dollar of war wages above the cost of living."

The extra Victory Bonds you buy today are the most important bonds you have ever owned because they battle to preserve the gains you have scored on the home front. Hold the war bonds you own. Buy extra Victory Bonds. That's self-interest which serves you and your country. Don't fritter away the job you did for yourself in seven previous war loans. V-I (Victory over Inflation) Day is today and every day you buy more and more Victory Bonds.

The Story of Progress

Quicksilver Bob

Of course, you remember that famous story about "Quicksilver Bob Fulton." He was determined to build a boat which would be driven by steam. Although destined to be an artist, he could not keep away from steam mechanics. After unsuccessful attempts, which brought him jeers and ridicule from his friends, not long after the turn of the 18th century, he launched the Clermont which brought to the world a new and better means of transportation.

The story of the steamboat has a parallel here in Nebraska. Forward-looking Nebraskans en-

visioned an inter-connected state-wide electric system which would provide a greater service for the progress and welfare of Nebraska and Nebraskans. Thus, your Consumers Public Power District was created... an efficient electric system, owned and operated by and benefitting Nebraskans. Through this efficient system, owned by the people and utilizing the vast water and power resources of the state for the benefit of the people themselves, Nebraskans today enjoy an abundance of dependable electricity at the lowest cost in history
