**OBITUARY OF
MATILDA R. KEYES**

Matilda R. Keyes died at her home February 19, 1946, at the age of 84 years, 11 months and 12 days. Matilda R., daughter of Edmund and Elizabeth Clark, was born in Otisville, N. Y., March 7, 1861. Later she moved with her parents to Matamoras, Penn. Then in 1880 she came to Inman with her mother and brother as her father had homesteaded here the place which is known as the Gifford place and he had written them to join him here.

On September 13, 1892, Chauncey Keyes and Miss Clark were united in marriage at the home of the bride's parents by Rev. Sylvanus the local Presbyterian minister. He took his bride to his homestead one mile south of town and together they shared the hardships of their pioneering life unflinchingly. This homestead was the home of the deceased until 1921 and then they moved to town and with the exception of two years which were spent in Elgin. To them were born five children, three sons and two daughters. One son, Merwyn, having preceded her in death. Those living are: Floyd E., Blanche E., Karl L., and Mildred A.

Early in childhood she joined the Dutch Reform Church. She was a member of the W. S. C. S. and an active worker in the Methodist Church, faithful in attendance and a charter member of Royal Neighbors, a member of the Coffee Club and loved fellowship with her friends. She and Mr. Keyes celebrated their golden wedding anniversary in September 1932.

She had enjoyed good health for one of her years until a year ago she had a severe illness and her strength had gradually failed. Monday morning she was stricken with a paralytic stroke and passed away early Tuesday morning as with the awakening life of a new day she went to her eternal sleep. Surely a most fitting time for a pure spirit to take its flight heavenward. With the eye of her strong Christian faith one could see at the dawn of the morning an invisible hand, wave a signal and a voice announce that the gates were open and that God's Angels were waiting to escort her in.

It is difficult to pay a tribute fitting to the memory of so noble a woman, one whose every day life was embellished by the most charming and loveable attributes of her sex.

She leaves to mourn her passing: Floyd E., Mrs. Blanche Rouse and Mildred, all of Inman and Karl L., of Omaha. Twelve grandchildren, eight great grandchildren and eight nieces and nephews and a host of friends. One grandson is in Japan at the present time.

Funeral services were held Thursday, February 22, at 2:00 o'clock at the Methodist Church in Inman, Rev. E. B. Maxcy conducting the services.

Palbearers were Earl Watson, Leo Tompkins, A. N. Butler, E. E. Clark, Roy Gannon and Elwin Smith.

The beautiful songs, "The Old Fugged Cross," "In the Garden," and "Sweet Bye and Bye" were

sung by Mrs. I. L. Watson, Mrs. Helen Sholes, Mrs. Grace Gannon, Mrs. Eva Murten, Kenneth Smith and M. M. Crosser.
Those from away attending the services were, Edward Clark, a nephew, from Glenrock, Wyo., another nephew, Lawrence Clark and family of Fowler, Kansas; also a grandson and wife, Mr. and Mrs. Walter Rouse of Grand Island.

F. E. Keyes had business in Stuart Monday.

The meeting started at 10:30 in the morning with a luncheon at noon with the afternoon session following. It was an interesting and instructive meeting.

MASTITIS TAKES 25% MILK OUTPUT TOLL

It is estimated that mastitis or udder garget is costing dairy farmers \$100,000,000 yearly, and in some areas nearly 25% of dairy herds are affected by it.

A common cause of mastitis is a chain-like germ (Streptococcus agalactiae) which may lie hidden in the udders of cows for months, or even years. Then, suddenly, it multiplies rapidly and produces irreparable damage to the delicate lining membranes of the cow's udder.

The disease may be either acute, with high fever and subsequent death, or a chronic, slow-going tissue change that ruins the cow's usefulness. Not all mastitis is caused by this particular "strep" germ. Sometimes serious outbreaks are due to "staph-type" germs—the variety responsible for boils and abscesses.

Fortunately, veterinarians have developed accurate methods for picking out the cows which harbor offending germs. Special chemical solutions have also been perfected which will free most cows

from infection when introduced in to the udder vault by a special injection method. Pre-cautionary measures include disposal of un-

Advanced mastitis.

treatable cows, milking infected cows last, sterilization of milking machines and cups, so-called strip-cup testing, and cow stable hygiene.

Combating mastitis will pay the farmer real dividends, because garget-free herds produce as much as 20 percent more milk than diseased herds.

You'll be so-o-o-nice to come home to

YES, it is difficult to imagine the thrill of returning from an afternoon out to find your meal all cooked, piping hot, ready to serve. Thanks to the automatic features of the new electric ranges—that can now be done. The electric timer is the clue to this bit of modern magic. You set one dial for the time the food is to begin cooking—the other dial for the time the food is to be done. This second dial automatically turns off the current at the set time and, presto, your meal is ready to serve whenever you wish. No watching, no waiting necessary. In addition to these automatic features, electric cooking is also safe, economical and, oh, so clean. Electric ranges still are not available in quantity but your dealer may be able to estimate how soon you can experience the thrill of cooking the modern way—with an automatic ELECTRIC range.

C. E. STOUT O'NEILL

THE OLD JUDGE SAYS...

OLD JUDGE: "Hank, you're a big grain producer... let me ask you a question or two?"
HANK: "Glad to have you, Judge."
OLD JUDGE: "Do you think the grain used by distillers is wasted as some folks are saying?"
HANK: "I certainly do Not! As a matter of fact, it is just the opposite."
OLD JUDGE: "How do you figure that, Hank?"
HANK: "From my own experience and from reports I've read. For the year endin' last June, the distillers produced over 1,200,000,000 pounds of distillers' dried grains... the best feed supplements we can lay our hands on. They are rich in nutrients. Why... I've never had such fat dairy cows, livestock and poultry as I have since I've been usin' these dried grains."
OLD JUDGE: "How do you use them, Hank?"
HANK: "I blend them in with original grain. This balanced ration has far greater feed value than the original grain itself. I can cut down on my whole grain feeding about 20% and still get better results."
