Little Sir Echo

A rather queenly young woman boarded a crowded bus. A tired little man

arose and gave her his seat. There was a moment of silence, "I beg your pardon," he exclaimed. "Oh, I didn't say anything," rejoined

the young woman. "I'm sorry," apologized the little man.

"I thought you said, 'Thank you'."

HELP WANTED WOMEN

Girls and women from 18 to 45 vears of age to come to Omaha for pleasant work in food processing plant. Experience not necessary. Paid while learning. 54c per hr. to start—44½ to 47½ hrs. per week. Time and one-half over 40 hrs. paid weekly. THE FAIRMONT CREAMERY CO., 12th & Jones, Omaha, Nebr.

WANTED TO BUY
WE HAVE BUYERS FOR GOOD FARMS
in Eastern Nebraska and western Iowa.
We have sold farms in this territory
consistently for over 25 years. All negotiations ethically handled. Write us description and price.

JOHN P. CLAASSEN COMPANY,

80 CLOSE-IN, paved, 80 level bottom, 200
not improved bottom, 160 Sarpy, 160
paved, level to gently rolling.
E. A. Schurman, No. 5002 Cass. GL 4752

Buried Loot

The salt mines in which the Germans hid looted treasures during the war were better hiding places than copper mines because mold formed on treasures hidden in the copper mines, while treasures in salt mines remained dry, since salt absorbs moisture.

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "in-nards", and help you feel bright and

DR. CALDWELL'S is the wonderful sen-na laxative contained in good old Syrup Pepsin to make it so easy to take. MANY DOCTORS use pepsin prepara-tions in prescriptions to make the medi-cine more palatable and agreeable to take. So be sure your laxative is con-tained in Syrun Passin

INSIST ON DR. CALDWELL'S—the fa-vorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it. CAUTION: Use only as directed.

CONTAINED IN SYRUP PEPSIN

Relieves pain and soreness

PAZO IN TUBES! Millions of people suffering from simple Piles, have found prompt relief with PAZO ointment. Here's why: First, PAZO ointment soothes inflamed areas—relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check minor bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

SUPPOSITORIES TOOL Some persons, and many doctors, prefer to use suppositories, so PAZO comes in handy suppositories also. The same soothing relief that PAZO always gives.

To Keep Abreast of Important

- "Under the Dome," the weekly newsletter from Washington, which appears every week in Pathender, answers these important questions:
- Will compulsory military legisla-tion be passed by Congress?
- ★ What effect will continued short-ages have on the forthcoming polit-ical campaigns?
- * Will Congress reduce taxes next
- ★ What is the United States doing to make UNO a success?
- The answers to these and many other questions of interest to you are answered in Pathfinder's ex-clusive feature—"Under the Done." To stay better informed, read Path-finder every week. Your local news-dealer sells Pathfinder.

WEEKLY NEWS ANALYSIS

State Department Blueprints International Atom Control; House Probes Spy Intrigue

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

WORLD RELATIONS:

Atom-Russ

Even as the United Nations Organization's security council strove to compose differences with Russia over the Iranian question, the U.S. state department issued a special report calling for the creation of an international agency to control all phases of atomic energy and avert atomic rivalry among the major powers.

Written by a distinguished board of scientists and technicians the report recommended the establishment of an atomic development authority that would own and lease property and conduct mining, manufacturing, research, licensing, inspection or other operations. While the authority would possess absolute control over the production of atomic weapons, it would permit utilization of atomic energy in such civilian fields as medicine, biology, chemistry and physics.

The U. S.'s secret processes in development of atomic energy out over contract differences. would be gradually unfolded to the United Nations authority as progressed for its development. Release of preliminary information necessary to discussion of setting up the agency would be followed by revelation of industrial know-how in manufacture and finally the method of constructing the A-bomb.

In releasing the report, Secretary of State Byrnes pointed out that the recommendations did not constitute official U.S. policy but could be considered as a basis for discussion of the creation of an international atomic authority.

Meanwhile, the security council worked on means to adjust the difficult situation posed by Russia's walkout in protest over UNO's consideration of Iran's complaint against the Soviets for failure to withdraw Red troops from the country. While Russia's withdrawal from the deliberations jolted UNO, the Soviets were quick to explain that their action did not mean they were withdrawing from the United Nations, but rather objecting to security council proced-

SPY INTRIGUE:

House Acts

Hard upon the arrest of a 29-yearold Russian naval officer for espionage by the FBI in Portland, Ore., the house committee on un-American activities, headed by Representative Wood (Dem., Ga.), voted to send investigators up to Canada to probe possible connections between the Soviet spy ring uncovered in the dominion and agents in

this country. Revealing that the committee had been aware of the FBI's investigation of the Soviet naval officer, Lt. Nicolai Redin, the committee counsel said that the group soon would hold hearings on subversive activities and call on a number of witnesses, including atomic scientists

and government employees. Meanwhile, Redin, nabbed for obtaining information about the destroyer tender USS Yellowstone, charged "the whole thing is a buildup for political purposes." A member of the Soviet lend-lease purchasing staff in the U.S., Redin enjoys no diplomatic immunity and was held on \$25,000 bond.

SCIENCE:

Use Germans

Some 160 German scientists are now in the United States working on military projects involving captured German equipment including rockets, buzz bombs, jet-propelled planes and aerodynamic research instruments, Secretary of War Pat-

terson announced. The original plan called for large scale utilization of German experts but was cut back radically following the Japanese surrender.

LABOR FRONT:

Farm Machinery Tie-Up

Government seizure of strikebound farm machinery plants appeared as the remaining alternative as negotiations between companies and union bogged down and equipment was badly needed for the maintenance of high crop production to meet domestic and foreign demands.

As the government pondered taking over the plants, the International Harvester company continued to resist the CIO-Farm Equipment Workers' demands for union security, maintenance of membership, dues checkoff, arbitration and methods for settling grievances. Both company and union agreed to a government fact-finding recommendation for an 18-cent an hour wage increase.

In addition to 30,000 workers in 11 International Harvester plants, 12,-500 employees in six plants of Allis-Chalmers and J. I. Case remained

Coal Snag

While the government kept one eye on the farm machinery situation, it trained another on the coal industry, where parleys between John L. Lewis' United Mine Workers and the operators sagged over the UMW chieftain's demands for the creation of a health and welfare fund.

Dropped last year during the bargaining over a new contract, the health and welfare fund issue was raised again this year by Lewis. who gave it No. 1 position on the negotiating agenda. Asserting that it would cost them \$50,000,000 annually, the operators proposed the creation of a joint committee to study an accident compensation plan as an alternative.

As a walkout in the industry loomed, the government prepared to control the shipment of an estimated 29,000,000 tons of bituminous coal above ground. Steel spokesmen said a miners' walkout might result in the restriction of production within two weeks.

New UAW Chief

A concerted drive to organize the white collar workers in the automobile industry loomed with the election of flery, red-haired Walter Reuther as the new CIO-United Automobile Workers president. Avowed foe of the communist faction within the UAW, Reuther thwarted the re-election hopes of R. J. Thomas, head of the union since 1938, who enjoyed leftist support.

In winning the presidency of the biggest union in the world, Reuther announced the organization of the white collar workers in the industry as one of his No. 1 goals. He also said an educational program would be undertaken to interest the membership in union activity and the UAW would strive for industrywide instead of company-wide bargaining to correct wage and working inequalities between plants.

The stormy petrel of the UAW. and head of the union's General Motors division, Reuther is 39 and destined for major leadership in the American labor movement. Fired from the tool department of the Ford Motor company for union activity in 1933, he organized an AFL local in the plant in 1935 and then led his men into the CIO in 1938.

Children Handicapped

The American Society for the Hard of Hearing estimates that one million children, not including the totally deaf, are suffering from some form of auditory

impairment. Since a person may suffer almost a 40 per cent hearing loss before it is observable, a child may be seriously maladjusted before anything is done to help him, the authorities add.

GERMAN ASSETS:

Uncovered in Spain

Enjoying the co-operation of the Franco government, the U.S. and Britain, acting for the Allied control council, have uncovered more than 100 million dollars in German assets in Spain and taken possession as the ruling force of the vanquished reich.

Included in the assets are controlling shares in extensive holding companies; 30 ships and other facilities of three shipping companies; 100 buildings; gold worth \$1,125,000; German paintings used for propaganda purposes, and a huge stock of champagne which was to be sold to obtain foreign exchange. Discovery of stock of the Socie-

dad Financiero Industria in a vault under the German embassy in Madrid gave U. S. and British officials control over a far-flung holding company comprising 17 corporations. Organized at the beginning of the Spanish civil war to supply goods and munitions to Franco, the holding company was supported by the Nazis.

Among the German businesses taken over were makers of tires and rubber, medical and electrical equipment, electrical appliances, radio sets and telephones, and light bulbs. Krupp's extensive licensing of patents and processes at a 3 per cent royalty also were subject to Allied administration.

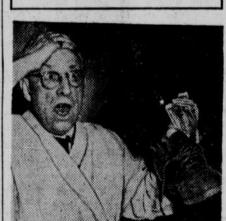

FARM EXPERIMENT: Dropped by Ford

In line with its announced policy of abandoning activities not directly connected with the manufacture of automobiles, the Ford Motor company will dispose of 10,000 acres of farmland in Michigan originally acquired for experimenting in the adaptation of agricultural products to industrial use.

The company also decided to give up the model school project organized for the communities surrounding the huge land holdings. Oneroom schools were remodeled, kinfour-year-olds, and studies shaped to permit practical application of textbook teachings.

resume manufacture of some of its own tires and a tugboat used for Ford piers on the Detroit river has been sold. Operated by a foundation separate from the company, the Ford museum and Greenfield village will not be affected.

Found: An Honest Man!

Honesty still is the best policy to Frank Barone, 71, who has worked hard operating a shoe repair shop in Chicago, Ill., for 40 years and knows the value of money. While reheeling some footwear for an unknown customer, the cobbler discovered \$1,100 in ten and twenty dollar bills stuffed deep inside the shoes. When the customer returned, Barone handed over \$1,090, insisting on withholding \$10 as a reward.

PEARL HARBOR:

Reopen Hearings

Pondering lengthy testimony on the Pearl Harbor disaster of December 7, 1941, the congressional committee named to investigate the catastrophe decided to reopen public hearings to obtain more detailed information from top military and naval officers as to their whereabouts on the evening preceding the attack.

Decision to call General Marshall, Admiral Stark and Rear Admiral Beardall back for questioning followed late testimony of Comdr. L. R. Schulz that President Roosevelt had sought to contact Stark on the night of December 6 after receipt of the first 13 parts of the Japanese message indicating a rupture in diplomatic relations.

While Marshall and Stark had told the committee they could not recall their whereabouts on the night of December 6, Schulz said that Mr. Roosevelt was informed that Stark was attending a theater. Beardall was said to have been dining with the late Admiral Wilkinson, chief of naval intelligence. Schulz's testimony may serve to refresh their memories, Committee Chairman Barkley said.

OUTDOOR SPORTS:

Licenses Up

America's hunters and anglers spent more than 26 million dollars for licenses during the fiscal year ending June 30, 1945. Although 8,-190,901 hunting licenses and 8,280,-232 fishing licenses were purchased this does not mean that 16,471,133 different sportsmen bought licenses to hunt or fish, for many bought both. There may have been even more since land-owners do not have to buy a license in some states.

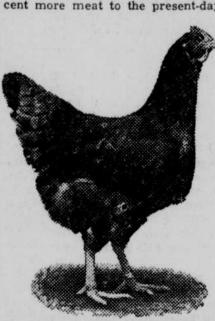

Better Market Fowl Needed by Farmers

Chicken of Tomorrow Must Have More Meat

While the development of meatier chickens has been remarkable in the past few years, there is still room for improvement.

In order to add at least 10 per cent more meat to the present-day

chicken, to secure a higher percentage of meat to bone structure, a hunt for the "Chicken of Tomorrow" is under way.

D. D. Slade, Lexington, Ky., poultryman, has been appointed chairman of a national committee which will supervise the distribution of \$8,000 in prizes to poultrymen who can improve their breed and strain, so as to produce the ideal dergartens opened for three- and market fowl. The contest is sponsored by the A & P Food Stores.

The contest will last for three years and provides for progress Pattern No. 1374 comes in sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 4 yards of 35 or 39-inch material. Under the new policy pushed by awards totaling \$3,000 with \$5,000 go-Henry Ford II, the company will not | ing to the poultryman who develops the ideal market fowl.

animal industry.

Vaccination Alone Can

with one ounce of the chemical.

treated successfully at one time

Not Cure Brucellosis The vaccination of heifer and bull calves 4 to 8 months old is usually advisable when there is any possibility of brucellosis, or Bang's disease. When an outbreak is starting it might be advisable to also vaccinate the adult herd.

Vaccination of calves, blood-testing of breeding cows, and proper feeding, sanitation, and management present a program that should largely do away with brucellosis.
