WILL BE APPRECIATED

The twelve members of the Senior Class enjoyed Sneak Day from Thursday evening until Sunday morning in the Black Hills. They visited many points of interest while there.

The American Legion Auxiliary held a meeting at the Legion hall last Wednesday evening. Plans were discussed for a meeting in a few weeks at which time all eligible to join the Auxiliary will be invited to attend.

Lt. and Mrs. Robert Kiltz and grandmother, Mrs. Addie Kiltz arrived here from Dallas, Texas, Thursday. Mrs. Addie Kiltz spent the winter there with her son and daughter-in-law Mr. and Mrs. Burton Kiltz and family. Lt. and Mrs. Robert Kiltz drove down to visit and to bring their grandmother home.

Mr. and Mrs. A. A. Walter went to Atkinson Tuesday to visit their daughter and son-in-law, Mr. and Mrs. James Kirkland.

Mrs. Blanche Edwards left Thursday for Tilden to visit relatives. A sister, whom Mrs. Edwards has not seen for ten years, is also visiting at Tilden. She is from Los Angeles, Calif.

Mr. and Mrs. Lee Mitchell and children, of Hastings, spent the week-end with relatives of Chambers.

Lt. Thelma Kiltz called her parents Thursday evening from Luzern, Switzerland. Lt. Kiltz has been stationed for sometime in Germany and is now on a vacation in Switzerland.

Mr. and Mrs. Bayne Grubb had the misfortune of having their brooder house destroyed by fire Saturday.

Miss Genevieve Held closed the term of school in district 56 with a picnic at the school house Friday.

Mrs. Genevieve Bell returned Tuesday from Neligh, where she had been helping in the C. J. Barnum home.

Mr. and Mrs. Charles Spath and Angie, and Mr. and Mrs. Richard Jarman and family were Sunday guests at the George Fullerton home.

Mr. and Mrs. Steve Shavlik have purchased the T. E. Newhouse hardware and implement business. They expect to have a formal opening in a few weeks.

Mrs. Sam Killham, of Superior, Wyo., arrived Tuesday of last week to visit her mother, Mrs. E. M. Brooks and other relatives.

Cliff Gillette, Chet Fees, Geo. Tompson and Everett Wintermout bought a fire truck in South Sioux City, which they brought up Sunday.

Mrs. Al Zweifel and daughter, of Dennison, Iowa, are spending the week at the home of her parents, Mr. and Mrs. Cliff Gillette.

Mr. and Mrs. William Turner received a telephone call Friday from their son, Robert, from New Jersey. He expects to be home this week with a discharge.

Mrs. Leon Jones spent Monday with her mother, Mrs. Adeline Butts. Mr. and Mrs. Jones have built them a new house at the Ed Jones home and moved into it last week.

Joe Ellen Hoerle has been assisting Mr. and Mrs. Vernon Harley the past week while they were both ill.

Mr. and Mrs. Omar McClenahan entertained the following guests at a birthday dinner Saturday, in honor of Mrs. Frank Porter, Mrs. Edith McClenahan Mr. and Mrs. Frank Porter and family, Mr. and Mrs. Vernon Smith, Mr. and Mrs. Wayne Rowse and Linda, Mrs. Letha Cooke and Bernard, Rev. McElheron, Donald Gibson and Marlin Rasmussen.

Mardell Butts, Gene Hoerle, Jimmie Jarman, Bob and Buddy Butts spent Sunday fishing at Erckson.

**May Phone From Moving Train**

**This Dazzling Prediction Is Made After 70 Years of Telephone Service.**

CHICAGO. — Before long you may be able to take up a telephone in a private booth on a speeding train and talk to your wife or office 1,000 miles away. The same service may be available to passengers on luxury airliners, says the Chicago Tribune.

Dazzling? Sure. But there's no doubt that new techniques developed in war research have unlocked vast new fields for the telephone, which first was used 70 years ago, on March 10, 1876, to be exact.

Some time in the future a telephone subscriber may be able to dial a toll call straight across the nation, just as he now dials from his office to his home. The charge would be automatically computed and recorded at the telephone exchange.

Nationwide dialing by long distance operators already is on the way. The American Telephone and Telegraph company says that within a few years operators will be dialing straight across the continent.

When this is adopted, A. T. & T. may divide the nation into 60 or 70 "numbering plan areas," each designated by a code.

**How It Works.**

If a call were being made from Chicago to Market 2-2100 at Newark, N. J., the Chicago operator would determine that New Jersey's area code was, say, 312 and would dial 312 followed by the listed number MA 2-2100.

A device already has been invented which, if no one answers, tells you: "There is no one here, but if you want to leave a message it will be transcribed."

Two-way voice communication by radio-telephone between motor vehicles already is here. Business concerns are using it for delivery trucks, taxi fleets, repairmen, buses and harbor and river craft. The Bell system says telephones in cars, trucks, and other mobile units will be connected with the general telephone system.

If a man wants to talk from his desk to the occupant of an automobile, Bell explains, he will first dial or ask for the mobile service operator. He will give her the call number or designation of the vehicle. She will send out a signal by dialing the call number. A tone or a light will indicate to the car occupant that he is wanted.

He will pick up his dashboard telephone, and the conversation starts. The driver of a mobile unit can originate calls merely by pushing the "talk" button to signal the operator.

**When Bell Talked.**

All this is a far cry from the day 70 years ago when Alexander Graham Bell first talked over a wire. Bell's first telephone patent was granted March 7, 1876, but at first earned no return. It was not until May, 1877, that the first telephones were put into use commercially.

At the end of 1945, there were 22,445,500 Bell system telephones in service, plus more than 5,400,000 operated by some 6,000 other companies.

Through radio-telephone, a phone user in this country can be connected with any one of more than 46 million telephones in service in the world. The radiotelephone provides direct communication between the United States and 39 foreign points.

The United States already has over 50 per cent of the world's telephones.

**Engagement Ring for 'Him' —Thousands Wear 'Em**

NEW YORK.—A Manhattan chemical engineer said that American men, despite reports to the contrary, definitely are wearing engagement rings.

Mathew Rosenthal, former marine captain in the Pacific, estimates his company has sold more than 312,000 such rings during the last 16 months.

"They're not diamonds," a representative of the firm explained. "They're made out of a secret mineral composition, almost as hard as a diamond."

The setting, which sells for \$17 wholesale, looks like a black cameo and has a man's and woman's head on it.

Rosenthal now has 27 lapidaries working on the new idea. Every worker is a war veteran.

The firm has sold 28,000 rings in Pennsylvania, 21,840 in Texas, 18,720 in Illinois and 6,240 in New York state.

"They don't go well in the big cities," the representative said, "but, boy, they sell in the rural districts."

Other states high on the sales list were Ohio, Michigan, Minnesota, Massachusetts, Indiana, New Jersey, Florida and Georgia.

**Build or Wreck Doesn't Matter, You Get a Medal**

ALBUQUERQUE, N. M.—Two forest servicemen were comparing their bronze star citations for World War II action.

M/Sgt. Aaron J. Jones, topographical engineer, explained he received his for directing construction of a B-29 base at Hsinching, China.

Capt. Paul Bedard, assistant forest supervisor, said he got his for leading a Chinese force that blew the base to bits after it had been abandoned hastily in the face of a Jap counteroffensive.

**U. S. Soldier Gets Back School Ring Lost to Nazi**

PITTSBURGH. — James DeLuco, who lost his Duquesne university ring to a German soldier during a battle in 1945, has it back again.

A New Jersey woman, who said her husband took the ring from a German soldier, wrote to the university asking them to find the owner of a ring bearing the initials "JDL." Duquesne traced it to DeLuco.

**And Be My Love**  
By Peggy Dern

To Megan MacTavish, Pleasant Grove was never quite the same good place to live in after Alicia Stevenson came to town. To Alicia, life was just one big rumor after another which she could spread around where they would do the most harm.

The murder of Alicia, the suspicion which falls upon Megan's father, and Megan's final awakening to love form the plot of Peggy Dern's most exciting novel.

**Cleaning Big City Is Tough Problem**

**Electric Grinders Solve It For Public Library**

NEW YORK.—This city, which prides itself on always having the biggest and best, is proving that it has some of the toughest dirt in the world and not of the columnist variety.

This item came up in connection with the cleaning of the New York Public library which has a 40-odd-year collection of grime. City engineers report that steam, ordinarily used to clean skyscrapers, has no effect on it and that sand-blasting is too harsh for the stone of which the building is constructed.

After experiments with various methods on portions of the building not visible to the general public, the problem was finally solved by the use of electric hand grinding machines having a mild abrasive on the revolving wheel. Today, workmen are swarming over the famous building, each with a portable electric grinder, restoring the stone to its original, natural beauty.

At the same time, a crew of 35 men is kept busy inside the building mopping the dirt on the quarry tile and marble floors tracked in by visitors who number nearly 3,000,000 per year—enough persons to populate cities such as Los Angeles or Philadelphia.

While it has been necessary occasionally to replace portions of the marble floor, owing to wear, library officials report that not one piece of the 62,026 square feet of tile has worn out in the 35 years the building has been open to the public.

As the workmen finish cleaning sections on the outside of the building, a coating of waterproof preservative is placed on the stone to retard the formation of a new coat of grime. This is the first time the building has been cleaned since the stonework was erected in about 1905.

To give some idea of the magnitude of the job, it is costing the city around \$100,000 and taking nearly a year to complete. Depending on the weather and the progress of the work, between 10 and 20 men are on the job every day. Cold during the winter months and the manpower shortage are two of the reasons the work is taking so long to complete.

John Ryan and son, Bill, of Gillette, Wyo., spent last week-end here visiting his brother, J. B. Ryan and other old friends and relatives.

**ON THE AVERAGE Nebraska Electric Rates Are LOWER than any Midwestern State According To The F. P. C.**

YOU are enjoying electric rates, on the average, lower than electric users in any of Nebraska's neighboring states in the middle west. A quick look at the map above showing the average cost of 100 kilowatts (based on national consumption average) shows that you in Nebraska are receiving electricity cheaper than your neighbors in adjoining states. It was not always thus—however. But, since the organization of Consumers Public Power District, your own state-wide electric utility, electric rates have been substantially reduced. At the same time, your Consumers has been consistently building up and integrating your system, thereby providing you with better, more reliable service. In line with this policy, your Consumers has maintained a long-range maintenance program which can result only in continued outstanding electric service at low cost.

MIDWESTERN STATES BORDERING ON NEBRASKA AVERAGE BILL FOR 100 K.W.H.	
NEBRASKA	3.47
Missouri	3.49
Colorado	3.93
Iowa	3.94
Kansas	3.95
Wyoming	4.15
S. Dakota	4.29

Electricity is Cheaper in Nebraska

**Nationally Nebraska's Low Electric Rates Rank Eleventh**

The same study made by the Federal Power Commission from which the map above was taken, shows Nebraska's electric rates in a favorable position nationally. Nebraska ranks eleventh of the forty-eight states in lower electric costs. And most of the states topping Nebraska in this national survey are those in which great hydro-electric sources of power have been in existence providing an abundance of cheap power. Even so, Nebraska still ranks favorably among those states with the very lowest electric rates in the nation.
