At this time the Bridge & Road Committees made the following Report in regard to their investigation of condition of road and bridge on the Big Sandy:

We, the members of the County Board of Supervisors whose names appear below, on the 27th day of November, 1946, inspected the small dike which was used to divert the water while the steel bridge at the mouth of the Big Sandy was being removed.

We found that this dike had been removed enough so that it did not in any way interfere with the natural flow of the water in said Creek.

We did, however, observe that the sand carried down by the waters of the Big Sandy Creek had filled the main channel and the trees adjacent to it, to such a height that it was diverting the waters of the Big Sandy down and across the road for some distance to a lower level. We also observed that the water from the Big Sandy Creek did not do any damage to the hay owned by Mr. Bartelson.

GEO. E. COLLINS, JOS. SCHOLLMAYER, ANDY CLARK, H. W. HUBBARD, J. C. STEIN.

On motion the Board adjourned until Dec. 20, 1946.
