Probably not very many know anything about the provisions of the labor law passed by congress over the president's veto but upon general principles the majority of citizens favored this action by congress because of some highhanded methods by organized labor in late years. The charge that Mr. Truman was playing into the hands of unionism can only be taken for what it is worth.

India has had enough of England and England has had enough of famine pestered India. In the meantime it will be interesting to watch now a people whose creed harbors the notion that upon death of dad he may come again crawling as a bug or bawling as a cow make out politically.

The rain is over. Through my open door comes the fresh breath of June cooled after the heat of day by the late shower. Out beyond the paved street the green plumes form a mass of waving tree tops. White clouds that had floated high in the celestial blue are gathering in horizontal lines along the horizon. And there has gathered that which will come out of nature's mysterious laboratory-50-million volt flashes of lightning, crashing thunder and another downpour. But for the minute the distant landscape shows its regal green under the glow of grateful sunshine.

It is not quite clear what the design in either the British or American zones in Germany may be, but there is no haziness respecting the designs in the Russian quarter.

Another bill has been introduced in congress to mitigate the worries of harassed citizens by trimming the income tax. Should it survive both house and senate it can hardly be expected to run the gauntlet of the White House successfully. Sentiment on prairieland is about four to one in favor of cuting down taxes all along the line. Something to this end has been accomplished by congress through the medium of appropriations, incurring the wrath of those who have open palms out for "federal aid."

A Roosevelt has been heard from again. Elliott drew a \$50 fine for speeding in a New York state town. You just

I do not know who is responsible for this, but that is immaterial. The lights had gone out on the bus; the tall man asked a lady if he could help her find a strap. "I've already found one," she said. "Then would you mind letting go of my necktie?"

The gent who said he wanted to die when he could find nobody to laugh with him probably meant laugh at him.

The high school class motto is about as important as a New Year resolution.
