VET OFFICE CLOSES AT AINSWORTH
Limited Budget Reason for Abandoning Contact Representative
 The full-time Veterans' administration contact office in Ainsworth will be closed effective Saturday because of budget limitations, Ashley Westmoreland, manager of the Lincoln regional VA office has announced.
 The necessary curtailment of VA's personal service to veterans in the Ainsworth area means that VA will rely increasingly on county service officers and representatives of service organizations to provide assistance needed by ex-servicemen, Westmoreland said.
 At the same time, Louis R. Eby, director of the Nebraska department of veterans' affairs and supervisor of county service officers in the state, extended assurance that his department is prepared to assume the added work occasioned by withdrawal of full-time VA offices.
 Both Westmoreland and Eby said that close liaison will be maintained between the VA regional office and the Nebraska department of veterans' affairs. O'Neill is presently served by the Norfolk VA office.

Big engines... long trains

mean lower cost to you!

But union leaders want "half-trains"—double crews!

Big locomotives are built to do a big job in the big country which is America—a big job in peacetime as in wartime. They are built to pull long trains.
 Long freight trains can handle more goods at less cost—to you—than short trains.
 Long trains mean fewer trains—fewer chances for accidents—fewer interruptions to traffic.
 But a few railroad union leaders oppose long trains—among their current 44 demands for changes in rules is one limiting the length of freight trains to 57 average cars. Why do they demand this?

For "safety," they say. But is it? Government figures show definitely that long trains mean greater safety to railroad employees and public alike.
 Then, if safety is not the real reason—what is the reason behind this demand? It is to make more jobs which are not needed—to get more pay! This "made work" would be sheer waste. Think of big, modern locomotives using only half their power.
 For this waste, you—the public—would have to pay. Higher costs mean a lower standard of living for everybody. Nobody wants that!

Here's the record...

In the quarter century... 1921-1946...

Average length of freight trains has gone up.....	39%
Average speed of freight trains has gone up..	39%
The rate of injuries to railroad employees has gone down.....	60%
Average wages paid railroad workers have gone up.....	84%
Price of railroad materials and supplies has gone up.....	58%
Railroad taxes have gone up.....	76%
But the average charge by railroads for hauling a ton of freight one mile has gone down.....	23%
