25 YEARS AGO November 16, 1922 Engineer Winterstein and his fireman had quite an exciting experience when a steam valve broke in the cab of the passenger engine three miles east of Royal on the way to O'Neill Saturday night. Engineer Winterstein had just shut-off the power and was coasting down the hill when the valve blew out filling the cab with steam. He and the fireman made their get-away through the windows and set the air on the front of the engine.

Nebraskans Can Well Be Thankful Among many things for which Nebraskans may be thankful is this State's excellent liquor control statutes. These laws are clear, enforceable, and have the backing of public sentiment. They provide that violating taverns may lose their license. That's why, today, tavern-keepers generally are striving to operate in the public interest—to keep their places clean, wholesome and decent—to eliminate sales to excessive drinkers and minors. You, as a citizen, have a duty in still further improving the State's beer retailing conditions. It's your duty to demand strict enforcement of the law—to discourage excessive drinking and unsocial conduct. The Nebraska Committee, U. S. Brewers Foundation, wants and works for strict law enforcement, and welcomes all opportunities to cooperate with citizens to this end.

The HISTORY of ELECTRICITY BENJAMIN FRANKLIN WAS THE FIRST MAN TO ACTUALLY PROVE THAT LIGHTNING IS ELECTRICITY THROUGH HIS FAMOUS KITE FLYING EXPERIMENT OF 1752. BEFORE THAT TIME LIGHTNING WAS THOUGHT TO BE ANYTHING FROM SULPHUROUS VAPOR EXPLOSIONS TO A SORT OF CELESTIAL ARTILLERY.

Even today, no one can tell you exactly what electricity really is. But modern science has discovered how to make electricity in huge quantities and harness it to serve hundreds of beneficial uses. Today, through an efficient network of power generating and distribution facilities, Nebraskans served by Consumers Public Power District, enjoy far greater use of electricity and at the lowest rates in history.
