

"Doubt cramps energy. Belief is power. Only so far as a man believes strongly, mightily, can he act cheerfully, or do anything that is worth the doing."

# I've been CHASING YOU 12 miles....

to tell You . . . . .  
You've Lost Your Oil"

Two cars raced along the highway east of Abilene, Texas. The second driver finally overtook the leader and signaled to stop.

"I've been chasing you twelve miles to tell you you've lost your oil," he called to J. W. Bell. Mr. Bell found that a rock in the road had knocked a hole in the crankcase, allowing the Conoco Germ Processed Oil to drain out.

But examination of the motor showed no damage done. The "Hidden Quart" had protected the motor!

Only Conoco Germ Processed Oil offers the extra protection of the "Hidden Quart" that

stays up in your motor and never drains away.

Only Germ Processed Oil actually penetrates and combines with metal surfaces.

You need that extra protection during the starting period, when almost half your motor wear occurs. Oils not Germ Processed drain away, leaving parts unprotected. Germ Processed Oil stays on the job to cut down starting wear, giving your motor longer life, with fewer repair bills. It is the safest, surest lubrication you can buy.

Change to Germ Processed Oil now at the sign of the Conoco Red Triangle.

We neither encourage "dry crankcase" experiments nor guarantee success under all conditions. But unsolicited letters from motorists, now in our files, tell of this and hundreds of other runs with empty crankcases but without damage.

THE HIDDEN QUART . . . THAT NEVER DRAINS AWAY

## CONOCO GERM PROCESSED MOTOR OIL

### FORT SILL HAS THRILLING HISTORY

One of the most historic of the old military strongholds of the West is Fort Sill, around whose sturdy ramparts many an Indian battle was fought in the good old days. The fort, also, was the last home of Geronimo, the notorious Apache chieftain who gave Uncle Sam plenty of trouble for so many years. In an interesting story on "Fort Sill and Its History" in the current issue of the National Republic, Carrie J. Crouch says:

"Beneath the Stars and Stripes which have floated over Fort Sill for sixty-three years, all that represents America have marched by—Indians, explorers, hunters, pioneers, soldiers and settlers. Yet, the glory of Fort Sill is not alone historical. It is today one of America's great army posts, one that added fame with its cantonment in 1917, one that will be ready if war drums beat again.

"Fort Sill came into life with the taming of the West, when civilization stepped forward from the army posts, when the only settlements in Indian Territory were Fort Gibson, Fort Arbuckle and Fort Cobb, and they were hundreds of miles apart and thousands of Indians were between. Fort Sill was the next step forward after the Civil War.

"In the winter of 1868-69, Gen. Philip H. Sheridan was stationed at Fort Dodge, Kansas, in command of the division against the Cheyennes and Kiowas, and one of those army dispensations arrived ordering a new base for winter operations. With a battalion of the Tenth Cavalry he moved down to Camp Supply, in the Territory, and then on to a new location near the Wichita mountains which he designated by calling it "Camp at Medicine Bluff Creek" and here in January, 1869, he left Major H. Kidd in command.

"The camp became permanent, came to be called Camp Wichita, and was increased by companies from the Sixth U. S. infantry, which were stationed at Fort Arbuckle; and by spring it had taken on the aspect of a western garrison. On July 2, 1869, orders came changing the name of Fort Sill in commemoration of the services of Brig. Gen. Joshua W. Sill, United States volunteer, who fell at Stone River, Tenn., December 31, 1862.

From obtainable records of the government, it is seen that Fort Sill was first intended as an Indian reservation for the Wichita, Kiowa, Comanche and Apache Indians. A tract of 23,040 acres was, by executive order of October, 1871, set apart for the Fort Sill Military Reservation, and it was subsequently enlarged by successive orders, and finally comprised 51,293 acres.

"With the effort to civilize the predatory tribes of the plains, Fort Sill became a scene of stirring events. It was in the locality where much had already happened. The historical Treaty of Medicine Lodge had been made the year before, just over the line in Kansas and that very winter, Black Kettle had been killed in the vicinity, one of the greatest Indian battles had taken place on the Washita River. In fact, it was the Battle of the Washita that had speeded the government's decision to place more military posts on the frontier.

"On November 27, 1868, Gen. George Custer with U. S. troops fought Black Kettle and his Cheyennes along the Washita. It was a noted battle for Custer and Black Kettle were famous fighters."

### BELLS ABOUT CASPER

Casper, Wyo., Jan. 10.—Editor of the Frontier: I thought maybe you would like to hear from Wyoming once more. Sure enjoyed reading about

the old timers and prominent men. You left out some of the famous ones such as Menter Trigs and many more I could mention but it was good.

Well, I will give you an outline of Casper if it will be of interest to some of your readers. It is a nice little city located at the foot of the Casper mountain, surrounded by bluffs and water on two sides. We have 11 grade schools, a Junior and Senior high school and three of the finest hotels west of Omaha. There are several lodges and churches, two fire houses, police station, several big stores and factories, two large steam laundries and several smaller ones. There are 2 railroads running here, this being the division point for both. There are also 4 refineries, and many other industries. The population is about 20,000. There is a big pay roll but quite a bit of unemployment.

There are a good many sheep, cattle and chicken ranches around here and not many chicken thieves. All around this is a real place to live. Living is cheap here and wages are good, good water, plenty of scenery, and plenty of wild game to look at but don't try to kill any out of season or it will just be too bad.

I read with deep interest the Flannigan trial the same as all the rest of the paper. I am always glad when I look the paper through and see, no deaths as I deeply regret to hear of any of the old timers passing away. They seldom die out here, you have to kill them.

We have had a wonderful winter, warm and balmy and not much snow. Stock is fat on the open range and meat is cheap. I bought a half mutton for \$1.50. Pork and beef sell for eight and ten cents a pound, that is the people peddle it for that. You see all kinds of ways of making a living, but they get there just the same.

Well if this doesn't kill you I will write again in the near future. I live at 830 Glenarm St. and the latch string is on the outside for any O'Neillites that come this way. Hoping a better year for all, will close.

O. W. BAKER.

### HEALTH SUGGESTIONS

This is the time of year for colds. People take them more or less for granted and pay little attention to them. Few stop to think that many diseases commence with a cold. Measles, influenza, whooping cough, scarlet fever and pneumonia start in this way.

There are two kinds of colds, the kind you catch from other people and the kind you take when there is no one around. The first you get when the germ enters your nose and throat when some one sneezes, coughs, or talks; or when you handle articles that have been used by a person with a cold. With the other kind the germs are present in the throat, waiting for a chance to go to work. Exposure which lowers resistance provides opportunity for the germs to work.

Treatment of colds should begin as soon as the signs of a cold appear. If all colds were properly taken care of the first day or two, few would develop into anything more serious. Stay in doors, and if possible in bed.

Drink large quantities of liquids and eat a simple light diet. Take a hot bath before going to bed and drink something hot, and wrap up in warm blankets to sweat the cold out of your system. It is best to call the doctor so that you can find out if the cold is more serious than you think. Medicine should not be taken for colds except under the doctor's order as it may prove harmful.

Care should be taken to prevent other people from catching the cold. Anyone waiting on a person with a cold should wash their hands immediately afterward. This sick person should sleep alone. Dishes and glasses should be either kept separate or boiled. The person should always cough or sneeze into a handkerchief, old rags, or paper napkins. Handkerchiefs should be boiled before being washed. Rags and paper napkins are best because they can be burned.

If the following rules would be observed, colds could be prevented.

1. Stay away from people with colds and avoid crowds in poorly ventilated meeting places.
2. Build up the body by means of nourishing food, regular hours of sleep daily exercise out doors and drinking six glasses of water daily.
3. Bathe frequently so as to accustom the skin to changes of temperature.
4. Wear sensible clothing.
5. Have diseased tonsils, adenoids and bad teeth removed.
6. Wash hands before eating.
7. Have rooms well ventilated. Windows should be open top and bottom to change the air, twice a day. Moisture can be provided by placing a pan of water on the stove or radiator.
8. Sleep with windows open winter and summer.
9. Keep your feet dry.
10. Cool off gradually.
11. If you have long and frequent colds see a doctor to find the cause.

### CITY COUNCIL

O'Neill, Nebraska, December 1, 1931.

Council met in regular session.

Present: Mayor Stout and Councilmen, Johnson, Phalin, Gillespie and Harty.

Minutes of previous meeting read and approved.

Treasurer's statements for the month of November read and approved.

On motion the following claims were allowed:

On General Fund:		
Elmer Neal	\$	3.00
O'Neill Concert Band	125.	00
L. K. Hough	2.25	
Contingent Fund	15.00	
Geo. A. Miles	6.05	
G. E. Miles	4.15	
Scott Hough	100.00	
W. J. Hammond	37.50	
Ed. T. Campbell	25.00	
Mellor Motor Co.	.25	
N. W. Bell Tel. Co.	3.15	
Interstate Power Co.	279.66	
The Frontier	2.76	
Awalt Spangler	3.50	
D. D. Hunt	150.00	
On Water Fund:		
C. E. Stout	1.25	
The Texas Co.	30.68	
Ed. T. Campbell	10.00	
Jos. Filsinger	120.00	
H. J. Hammond	10.00	
Fairbanks, Morse & Co.	5.95	
James Davidson	14.30	
Roy V. Johnson	10.50	

Motion made and seconded that C. E. Stout be refunded \$19.00 on his water account that was overread.

Carried.

Motion made and seconded that the City accept the policy of the New York Fire Insurance Company for \$250,000.00 on the pump station and contents at a premium of \$13.72 and dated December 23, 1931 and in force one year from date, and a warrant drawn on the General Fund payable to L. G. Gillespie, Agent, in payment of premium. Carried.

On motion the Council adjourned, subject to the call of the Mayor.

ED T. CAMPBELL,  
City Clerk.

### ST. MARY'S DEFEATS CLEARWATER HIGH

Two fast games were played in St. Mary's gym on Friday, Jan. 15. In both games St. Mary's defeated Clearwater, the first team game 26-7, the second 14-2. At the end of the first half of the first team game the score was 12-0 in St. Mary's favor. In the second half the Clearwater boys showed more pep, but St. Mary's coach had also said something to his boys during the half. Clearwater was one of the cleanest teams that St. Mary's has played so far this season.

The line-up:  
St. Mary's: Biglin f, Burks f, Bordeaux f, Beha c, Harty g, DuBray g, Price g.  
Clearwater: Calvert f, Notes f, Waterman f, DeCamp c, Lee c, Miller c, Hixson g, McKaney g.

The remaining schedule to be played is:  
Jan. 19—Spaulding here  
Jan. 29—Page at Page  
Feb. 2—O'Neill High at O'Neill High  
Feb. 5—Chambers at Chambers  
Feb. 9—St. Joseph (Atkinson) here  
Feb. 12—Long Pine at Long Pine  
Feb. 16—Inman at Inman  
Feb. 19—O'Neill High here  
Feb. 7—Ewing at Ewing.

### COUNTY AGRICULTURE

James W. Rooney,  
County extension Agent  
80 Per Cent of Holt County 4-H Clubbers Complete Record  
Figures released from the State

4-H club offices at Lincoln show that 80 per cent of the members enrolled from Holt county completed their record last year. The figures show that two hundred and sixty members carried three hundred twenty-one projects and two hundred ten members completed 249 projects.

Ninety-four boys carried one hundred and nine projects and seventy-five of the boys enrolled completed eighty-four projects. One hundred sixty-four girls were enrolled in two hundred and twelve projects and one hundred thirty-five of these girls finished one hundred sixty-five projects.

Ten of the thirty-one clubs that were organized have a one hundred per cent completion. Every boy and girl who enrolled in the club completed their project. These clubs are:  
Name of Club . . . . . Address  
Thrifty Pig Club . . . . . Amelia  
Grand Prairie Baby Beef . . . . . Atkinson  
Amelia Baby Beef Club . . . . . Amelia  
Page Poultry Club . . . . . Page  
Merry Makers Canning . . . . . Ballagh  
Snappy Cooking Club . . . . . Emmett  
Lucky Clover Clothiers . . . . . Chambers  
Darling Darners Clothing . . . . . Emmett  
Luff-O-Lots, Clothing . . . . . Stuart  
Wide-A-Wake Clothing . . . . . Chambers

### Recommend New Rabbit Repellent

Sulfonated oil recommended by the University of Minnesota is the best repellent to protect trees and shrubbery against rabbits and mice where there is so much snow on the ground, E. H. Hoppert of the Nebraska Agriculture College says. The directions for mixing and applying the repellent worked out by the Minnesota station are: Take one quart of linseed oil either boiled or raw and heat it to 470 degrees out of doors where there will be no danger of fires being started if the oil boils over. Use a container five times as large as the space the oil occupies in the container when cold. Remove the oil from the fire and add finely powdered flowers of sulfur a teaspoonful at a time, stirring each spoonful well into the oil. The oil will get hotter, foam badly, and give off an obnoxious odor. The procedure should continue until three ounces of sulfur have been added per quart of oil. The mixture should be painted on the tree trunks and branches. Any that drops to the ground will help keep the mice from digging into the ground around the roots.

### DAN WILL REPEAT

State Journal: Dan Swanson, state commissioner of public lands and buildings, removed all doubts about his intention Wednesday by filing again as a candidate for renomination on the republican ticket. Some months ago he was ill but has regained his health and now proposes to stand again for election. Mr. Swanson took office in January, 1919, and at the end of his present term, at the close of 1932, will have served fourteen consecutive years or seven terms. He retains his legal residence in Fremont, where he lived when elected. He owns his home there. He carried his home county of Dodge at the last state election by a majority of 2,700 when a democratic governor carried it by several hundred and all republican county officers except one were defeated. George C. Snow of Chadron, secretary of the senate, said he would not run against Swanson.

John McCoy of Alliance, democrat, will again attempt to gain the nomination for congress in the fifth district.

Edward R. Burke of Omaha will try for congress in the second district.

Thomas C. Manhart, democrat, of Greeley, will run with Representative O'Malley as a democratic competitor if the latter accepts a petition nomination now on file.

Senator J. C. McGowan of Norfolk, has filed for the republican renomination in the Eleventh senatorial district. He is president pro tem of the state senate.

Daniel Livingston of Nebraska City has filed as a candidate for judge of the second judicial district.

### EDUCATIONAL NOTES

The first Eighth Grade Examinations will be held on Friday, Jan. 22, at all towns in the county and at Deloit, Phoenix and Scottville.

Teachers' Examinations were held on last Saturday. One hundred and eight prospective teachers took the examinations at this time. Four hundred and eighty nine papers were written. Miss Martha Kaup, a student of the Stuart Public School, has earned a passing grade in all her teachers' examinations with an average of 81-17 per cent. Miss Kaup finished her grades at the November examination and is the first student in the County to earn all grades for her certificate.

Miss Lucy C. Perry, Red Cross Nurse, accompanied Mrs. Parker to School District No. 15 and District No. 5 on Friday of last week and made a physical examination of the pupils in each school. Thirty-nine pupils were examined, ten pupils being absent from school on that day. A number of defects were found but most of them were slight. Only eight pupils of the thirty-nine were found to be entirely without defect. The parents were invited to be present and at the close of the examination Miss Perry talked to the Patrons and children on topics of "Health". During the three months that Miss Perry is working in O'Neill, every Friday will be spent in going into the rural schools surrounding O'Neill and examining and talking to the parent and children.

Notice has been received that there will be a Short Course in Agriculture, that will start on January 18th at the Nebraska School of Agriculture at Curtis, Nebraska.

## ROCKNE SIX

SPONSORED AND GUARANTEED BY STUDEBAKER

FREE WHEELING AND FULL SYNCHRONIZED SHIFT

4-POINT CUSHIONED POWER

NEW SWITCH-KEY STARTING

Check what you get for your money

The Rockne Six is big . . . it's roomy . . . it's powerful.

It gives you the finest Free Wheeling built—plus Full Synchronized Shift . . . it has 4-Point Cushioned Power that literally pillows the engine in live rubber at all 4 points of suspension . . . it has Switch-Key Starting that simultaneously switches on ignition and starts the engine—automatically starts it again should you stall it.

And behind the Rockne is the dependable guarantee of Studebaker, oldest manufacturer of vehicles in the world.
