

Mercol Wax Keeps Skin Young

Get an ounce and use as directed. Fine particles of aged skin peel off until all defects such as pimples, liver spots, tan and freckles disappear. Skin is then soft and velvety. Your face looks years younger. Mercolized fat brings out the hidden beauty of your skin. To preserve wrinkles use one ounce powdered Stoville dissolved in one-half pint witch hazel. At drug stores.

Installment Weddings Gain

Reports from Berlin state that installment weddings are becoming quite the thing in Germany. Firms supply a trousseau for the bride, swallowtail outfit for the bridegroom and all other things necessary for the wedding, including a short honeymoon trip. All this is to be paid for on the installment plan after the couple return and settle down.—Pathfinder Magazine.

END CHEST COLDS QUICK WITH GOOD RED PEPPER HEAT

Relieves Almost Instantly

When noisy breathing and sharp pains in chest, dry cough or washed out feeling broadcast the presence of a chest cold, just try this safe and sure remedy that relieves chest colds and aches and pains of rheumatism, neuritis and lumbago almost instantly. It is the penetrating, healing heat of red peppers. Now this genuine red peppers heat is contained in an ointment you simply rub on to get relief in less than 3 minutes. It is **Rowles Red Pepper Rub**. No blister, no burn nor harm. It does bring the relief you want. Get a small jar from your druggist.

Yes! Please "Ladies and gentlemen," said the lecturer, "I understand the language of wild animals."

From the back of the hall came a voice: "Well, the next time you see a skunk, ask him what's the big idea."

Wrong About Sports

The American attitude toward sport is wrong. We are the only people in the world who make sport a business.—American Magazine.

Absent Treatment Indicated

"Is your love for me dead?" "No, but it's very, very ill."—Passing Show.

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

Took Name From Castle

The name "Hohenzollern" is derived from Castle Zollern, the ancestral home of the family. The name literally interpreted d, therefore, means High Zollern.

can prepare an omelet without scorching one side.

When one is old he can get a kick out of annexing \$10,000 and out of very little else.

Quickest Way to Darken Gray Hair Naturally

Don't dye hair. Science has discovered a quick, simple way to darken gray hair naturally.—so nobody can tell—restore its original shade safely and as easily as brushing. It makes the hair healthy. Finest way known to get rid of gray hair, as thousands testify. Try it. Pay druggist only 75c for a bottle of WYETH'S SAGE & SULPHUR and follow easy directions. Results will delight you.

REPAIRS HALT SHRINE TREK

Pilgrims Asked to Defer Visits to Mecca in Mexico

Mexico City.—(UP)—Pilgrims to the Virgin of Guadalupe shrine have been asked to stop their visits in order that repairs may be finished in time for the celebrations this month, which will mark the 400th anniversary of the appearance of the Virgin at Guadalupe, where the church is built.

More than 1,500,000 pesos already have been spent on the Basilio decorations, which will cost 2,000,000 pesos when completed. The decorations by Gallotti, one of the most famous artists of the country, have been compared to that of the Italian artists of the 16th century in Rome. The theme is religious life in Mexico, from the time of the pyramids and idol worship, to the arrival of the missionaries and the introduction of Catholicism. The legend of the Virgin, and the miraculous roses which she caused to grow on the rocky summit of the hill, and the building of the church in her honor, also are depicted.

The arches of the church and the magnificent Venetian mosaic work in the cupolas, which cost more than 500,000 pesos, are considered equal in beauty, though on a smaller scale, to those of St. Peter's, in Rome.

RED CROSS HAS TEST OF SPEED

Washington.—(UP)—Faced by disaster, the American Red Cross headquarters here can send appeals or advice to its representatives throughout the entire United States within two hours and 25 minutes.

This was proved recently when the Army Amateur Radio Association was mobilized for a speed test. Not only was every Red Cross representative reached in less than two hours and a half, but messages were delivered to 338 of them within 18 minutes after the radiograms left Washington.

The test was described today in the annual report of Maj. Gen. Irving J. Carr, chief signal officer of the army, to Secretary of War Hurler. He cited it as an example of the training and co-operation of various extra-army organizations, which will enable the war department to set up fast and extensive communications in the event of war.

Meteorological information furnished by the army air corps last spring by the signal corps and the U. S. weather bureau enabled the concentration and dispersal of more than 650 airplanes from all over the country without accident, Carr's report said. These planes were gathered at Dayton, Ohio, and went through maneuvers on the eastern seaboard without a single fatality or serious crash.

PLANS FIGHT ON DROUGHT

Moscow.—(UP)—A national scientific program for fighting droughts was worked out here by a conference of agricultural experts, government representatives and leading scientists. The proceedings were followed with intense interest by the entire population, which is intimately acquainted with the effects of drought.

HEALTH RECORD IMPROVES

Sacramento, Cal.—(UP)—Despite unfavorable economic conditions, California's health record continues to improve. While the estimated increase in the population of the state during the last year is 3.8 per cent, the increase in the number of deaths for the first half of the year was only 2 per cent, the state board of health reports. There were 34,475 deaths for the half-year period.

U. S. PILGRIMS VISIT SHRINE

Increasing Number of Americans Make Trips Each Season

Lisieux.—(UP)—The number of American pilgrims making voyages to the sacred shrine of Sainte Therese has been increasing from year to year, with the seeming evidence that the "Little Flower" saint had been adopted as the patron saint of America.

Four American bishops made the pilgrimage in 1931—Right Revs. Edwin S. Byrne, Bishop of San Juan, Porto Rico; John Gregory Murray, Bishop of Portland, Me.; Francis W. Howard, Bishop of Covington, Ky., and Edwin V. O'Hara, Bishop of Great Falls, Mont.

During 1931 it also was announced that the late Leopold Huffer, New York banker and philanthropist, had contributed funds necessary for the erection of a side chapel in the "Basilica of Peace" now being built on the hills above Lisieux. The "Inferior Basilica" is to be dedicated July 3, 1932, following the Eucharistic Congress in Dublin.

It is understood that the Knights of Columbus will send a pilgrimage party to Lisieux on this occasion; also that the Rev. John Dolan, rector of the National Shrine of Sainte Therese in Chicago, is heading a large group of pilgrims from the United States and Canada. Denis Cardinal Dougherty, Archbishop of Philadelphia, is the American member of the committee of honor which is sponsoring the new basilica, and is hoped he will be able to make a pilgrimage to Lisieux next year.

U. S. AIR MAIL COST WAS LOW

Washington.—(UP)—Development of the air mail system has cost the government little in comparison with other forms of transportation and communication, according to an article by Charles L. Lawrence, president of the Aeronautical Chamber of Commerce of America, Inc., which appears in the November issue of the magazine, "Western Flying."

Sixty-seven millions have been spent by the postoffice department on the air mail system in the last 14 years and Lawrence has it figured that the cost of development for each mile of that system is less than one-third of the amount expended by the government for every mile of motor road construction and 2.94 per cent of the investment represented by a single mile of railway.

Lawrence further points out that the capacity of the airways, unlike that of railways or highways, is unlimited; that it will not be necessary to rebuild from time to time as traffic increases, for with the establishment of an airway the only subsequent costs are for maintenance.

INDIA AIR MAIL UP

London.—Air mail postage to India has increased considerably since 1930. The Imperial Airways reports that during the third quarter of 1931 a total of 8,746 pounds, an increase of 13 per cent over the 7,712 pounds carried during the same period of 1930, was transported between England and India.

at home. Luis returned home recently to find his bedroom furniture, eight shirts and other articles of clothing missing. He called in detectives and they found the missing articles in the home of the neighbor, who had "just borrowed them."

Portland, Me.—(UP)—The Rosin club here is believed to be the oldest musical organization in the United States whose membership is exclusively women. It was founded

Brazil, with an area of 1,172,325 square miles, has a population of 39,300,000.

OF INTEREST TO FARMERS

FARM BREEDING PROGRAMS

St. Francis of Assisi, beloved by all the beasts and birds, once made a wish that omen and cattle could have extra rations of corn and hay at Christmas time. The good saint's wish came true in Europe and today, on Christmas Eve, the peasants share their Christmas feast, no matter how simple, with their animals. In Sweden, the cattle are given the best that the house has, as well as a taste of everything their masters have had to eat. In Silesia, on Christmas Eve, all the beasts are given wheat. The horses are given the best hay. In Germany, corn is put on the roof for the birds, and in Hungary the last sheaf that is harvested is kept and given to the wild birds on New Year's morning. Up until the nineteenth century, even England joined in remembering Him by feeding those who gave their stable home for His birthplace. Cattle and oxen were given extra feedings on the eve of Christmas, poultry received extra corn because, as the Englishman said, "All creation should rejoice on Christmas, and how else can a dumb animal rejoice except by being fed and housed comfortably? Certainly our flocks and herds have had much to do with at least the partial fulfillment of our many desires for the material things of this world. Unselfishly, they have made the very best of every condition and limitation placed upon them by environment and heredity. Unhesitatingly, the good and true animal has hazarded her own health to attempt to fulfill her purpose in life. Is not this Christmas time an appropriate season to consider these faithful farm animals? Have we made an honest attempt to satisfy their lowly needs by providing them quite comfort and suitable feeds? The people who get the most out of life practice the spirit of Christmas every day in the year. The herdsman who gets the most from their animal friends make every day an animal Christmas."

ANIMALS AT CHRISTMAS

St. Francis of Assisi, beloved by all the beasts and birds, once made a wish that omen and cattle could have extra rations of corn and hay at Christmas time. The good saint's wish came true in Europe and today, on Christmas Eve, the peasants share their Christmas feast, no matter how simple, with their animals. In Sweden, the cattle are given the best that the house has, as well as a taste of everything their masters have had to eat. In Silesia, on Christmas Eve, all the beasts are given wheat. The horses are given the best hay. In Germany, corn is put on the roof for the birds, and in Hungary the last sheaf that is harvested is kept and given to the wild birds on New Year's morning. Up until the nineteenth century, even England joined in remembering Him by feeding those who gave their stable home for His birthplace. Cattle and oxen were given extra feedings on the eve of Christmas, poultry received extra corn because, as the Englishman said, "All creation should rejoice on Christmas, and how else can a dumb animal rejoice except by being fed and housed comfortably? Certainly our flocks and herds have had much to do with at least the partial fulfillment of our many desires for the material things of this world. Unselfishly, they have made the very best of every condition and limitation placed upon them by environment and heredity. Unhesitatingly, the good and true animal has hazarded her own health to attempt to fulfill her purpose in life. Is not this Christmas time an appropriate season to consider these faithful farm animals? Have we made an honest attempt to satisfy their lowly needs by providing them quite comfort and suitable feeds? The people who get the most out of life practice the spirit of Christmas every day in the year. The herdsman who gets the most from their animal friends make every day an animal Christmas."

FIGHT HORSE PARASITES

One of the best winter jobs done by the township Farm Bureau organizations in the past year or two has been the cooperative effort put forth to get all of the farmers of the township to treat their horses for bots, introduced primarily as a control for the pestiferous nose-fly, the carbon disulphide treatment has since proved to be effective against most internal horse parasites. A survey by the extension service of Iowa farms where horses were treated last year definitely shows that the carbon disulphide removes the round-worms from the small intestine, many red-worms from the large gut, as well as killing in the horse's stomach the bots of the nose-fly, the throat-fly and the leg-fly. Around 200,000 horses, in forty-five counties, were treated in Iowa last winter. Questionnaires returned from a limited number of farmers indicate that about 85 per cent of the owners were wholly satisfied with results. Most failures to get complete control can be explained, and many of them could have been prevented. In one case, for example, the origin of nose-fly on a treated farm was traced to bot-infested horses in a nearby road grading outfit. Practically all farmers reported that their horses came thru the winter in better shape and were more fit during the heavy spring work. A reduction in number of colic cases has been reported from several areas, a change which veterinarians attribute to the parasite control work. Perhaps the most pleasing result has been observed in bot-infested young horses, which seem to take on new life after treatment. The carbon disulphide capsules are best given in December or early January, although satisfactory results are obtainable as late as the latter part of February. In order that the treatment will be most effective, it is very essential to clean out the manger, remove all bedding from the front of the stall, and withhold grain from the animal for from twelve to fifteen hours before the capsule is given. In this starvation period should be carried out a full two hours after treatment. Water may be provided at any time, however. By going on a community basis, it is possible to get the horses treated by a veterinarian around 50 cents a head, capsule included. Recently, a new type capsule, which does not immediately release the carbon disulphide, should it be accidentally broken has come on the market. This capsule lessens somewhat the risk of accidentally getting the disulphide gas into the horse's lungs when the balling gun is in the hands of an inexperienced person. However, the most satisfactory results are obtained when the treatment is given by a competent veterinarian.

BARLEY FOR PIGS

Soaking whole or ground barley for feeding pigs is being done more and more, and accurate records are kept of feeds consumed and of gains made therefrom. Some years barley is not of as good quality as desired for feeding pigs due to light weight caused presumably in most cases by weather conditions. In a recent test this quality of barley compared with corn for feeding pigs? A western station fed 40 pigs averaging about 37 lbs. each in four groups of 10 pigs each as follows: group I was fed shelled corn and tankage; group II was fed dry ground barley and tankage; group III was fed soaked ground barley and tankage; and group IV was fed soaked whole barley and tankage. The grain and tankage were hand-fed night and morning. Each group was fed alfalfa pasture which, owing to lack of moisture, furnished rather poor forage during the latter part of the feeding period. The number of pigs and area of alfalfa pasture were adjusted to 15 pigs per acre. The particular trial the barley fed was lighter weight than normal, thus increasing the percentage of hull. The quantity of feed required, grain and tankage, to produce 100 lbs. gain in the several groups was as follows: group I, shelled corn and tankage, 306.78 lbs. corn and 28.78 lbs. tankage, total 335.56 lbs.; group II, 352.15 lbs. dry ground barley and 26.17 lbs. tankage, total 378.32 lbs.; group III, soaked ground barley 413.87 lbs. and tankage 31.69 lbs., total 445.56 lbs.; group IV, soaked whole barley, 433.01 lbs., tankage, 32.74 lbs., total 465.75 lbs. Comparing the efficiency of these several ways of preparing barley, and considering corn as 100 per cent, we find the dry ground barley 88.69 per cent; the soaked ground barley, 75.31 per cent; the soaked whole barley, 72.01 per cent. It is thought by those in charge of the experiment that soaking the ground or whole added too much bulk to a feed that was already quite bulky and high in fiber for weaning pigs. Even so, other feeding trials indicate it does not pay to soak either ground or whole barley for pigs. The difference in efficiency is not, as a rule, so great, however, as in this trial. The ratio of tankage to corn fed to group I pigs was 1 to 10.6; the ratio of tankage to dry ground barley (group II) was 1 to 13.4. While light weight barley is not as good feed for weaning pigs, if it is the only feed available, it would seem the best way to feed it is to grind and feed dry—preferably in a self-feeder—supplemented, of course, with milk, tankage, or a mixture of tankage or fish meal and other protein feeds such as linseed meal, wheat and rye middlings.

MATURING HEIFERS

If dairy farmers undertake to roughen up their heifers they will not get satisfactory results. Non-legume roughage should be supplemented with three to four pounds per head daily of a grain mixture containing about 16 per cent crude digestible protein.

A majority of mounts used by the Pony Express were half-breed California mustangs.

HORSES VS. TRACTORS

The argument is fallacious that the 4,341,000 persons engaged directly or indirectly in the production, sale, or servicing of motors means more to farm markets than the 18,703,000 horses and mules that have been displaced by such motors or prevented by them from coming into existence and use. For the 4,341,000 would be working at something even had motors never been invented and they and their families would be buying just as much food and clothing as they do now. "The driven burr" is the complaint of a dairy farmer whose surplus has driven butter to unprofitable levels, the hog raiser constantly confronted

GET LINED UP

The early months of the new year afford time for us to check up on our feed production program. Are we producing the right kinds of feeds? If not, why? Are we getting large yields per acre of crops best suited to feeding dairy cows? Let us begin to think on these questions.

with the threat of too much work, the sheep producer whose lambs are now selling for less than cost, the beef raiser whose prices, now reasonably satisfactory, are threatened by an overproduction which probably drive them to new low levels within the next six years—all are concerned and should vigorously support horse and mule production and use, beginning on their own farms. "The man who displaces horses with a tractor truck and then complains about the low price of farm products is like the boy who eats green apples and then cries with the stomachache."

LOOK OUT!

Counterfeit Aspirin!

THOUSANDS of boxes of counterfeit aspirin have been put on the market. Watch out. Take no chances and flatly refuse to accept any box not marked "Genuine Bayer Aspirin." Don't put any tablet not marked "Bayer" in your stomach. Tell your family and your friends of this. Refuse any preparation offered you as the "same" or "like" Genuine Bayer Aspirin. Demand and accept only this box, this "Bayer" marked tablet

DOES NOT HARM THE HEART

Developing Powers of Observation in Child

Teach a child to be observant of everything around him, and you give him one of the soundest starts in life, for observations are very rarely wasted.

The Japanese are a race who appreciate to the full the value of observation, and their babies are taught it unconsciously almost from their cradles. They learn it as a game. The Japanese mother will give her child a tray of objects to look at for a few minutes, then the tray is taken away and the child tells her all about its contents. It is quite a thrilling game when here are lots of things to remember, and children take to it very quickly.

To be able to observe swiftly and accurately will often help one very substantially in life. To take in one's surroundings quickly, and to be able to sum up characters fairly accurately, are two very useful assets and each derived to a certain extent from observation.

When there are decisions to be made, it is possibly the man or woman who has been taught to observe from childhood who stands the best chance of making happy ones.

Suffered in Womanhood

Wilton Junction, Iowa.—"For several years I have taken Dr. Pierce's Favorite Prescription. I have seven children and I wish I had known of this medicine years ago when I reached womanhood, as I always suffered so," writes Mrs. Earl Atkinson, Lock Box 96. "Seven years ago I gave birth to a healthy baby and two years ago to another. I don't think I would even be here if it hadn't been for Dr. Pierce's medicine. I tell every one I meet about them. I use the 'Favorite Prescription' as a woman's tonic, the 'Golden Medical Discovery' for my blood, and the 'Pleasant Pellets' as a laxative." Sold by druggists.

Users of Dr. Pierce's medicines are entitled to free medical advice. Write to Dr. Pierce's Clinic in Buffalo, N. Y.

Scrap-Iron Ship Completed

Tests of the ship made entirely of scrap iron and other waste material have proved that the vessel floats and may take its builders, two unemployed Austrians, from Vienna to Abyssinia as originally planned. The men made the entire vessel, and declare nothing used in it was bought. They also designed the peculiar craft, which resembles a submarine. It has been named the Nautilus II.

Wants Him Really Made

Many a wife is perfectly willing to stick up her nose and wear expensive finery to advertise what a success her husband is, who wouldn't turn her little finger over to help make him one.—Cincinnati Enquirer.

New Moon

"See the beautiful new moon; isn't it lovely, Jamie," said mamma. "Is that it, way up there trimmed round like a tea party?" asked Jamie.
