COUNT YOUR CHANGE

Collier's, The National Weekly: There's no argument in this editorial. It's merely a collection of facts, incontrovertible, eloquent facts that confound those who profess to see America slipping down into a state of effortless despair. . . .

Total bank savings exceed \$29,000,000,000, equal to more than \$1,000 for every family in the land. Savings depositors number 52,000,000, nearly two per family.

The number of Americans owning stock has increased almost 40 per cent since 1929.

A group of 102 companies which had 5,539,036 stockholders at the end of the boom year had 7,675,143 stockholders at the beginning of this year.

One company alone today has over 665,000 stockholders, a gain of more than 195,000 since the boom. This company has assets exceeding \$3,200,000,000. . . .

Our total stock of gold is \$4,000,000,000. No other country ever possessed so much. Britain, for example, has only \$588,000,000. Currency in circulation aggregates \$5,464,000,000, or \$700,000,000 more than in the boom.

Last year \$16,500,000,000 worth of new life insurance was written.

Total insurance now carried is estimated at \$109,000,000,000, or not far short of \$1,000 for every man, woman and child in the United States. Policies in force total 127,800,000. . . .

Such safeguard . . . is enjoyed by the people of no other nation in the world.

Our total national wealth, estimated at \$329,700,000,000, is greater than that of a dozen Continental European countries combined.

The income of the American people comfortably exceeds \$1,000,000,000 a week.

The per capita income here is far greater than in any other land.

There are still six or seven persons gainfully employed for every person idle.

No fewer than 25,800,000 automobiles are owned by Americans. . . . This total is almost three times the number owned by all the rest of the world.

Americans possess far more telephones (19,500,000) than all other countries. . . . Radios . . . multiply . . . over 16,545,000 . . . unapproached by any other people.

How many new domestic mechanical refrigerators have been bought, would you guess? A grand total of fully 3,750,000, at an estimated expenditure approaching \$2,000,000,000. . . . In no other part of the globe do half as many homes enjoy such luxury—Americans are rapidly coming to regard it as a necessity.

A recent survey of 29 typical towns revealed that 71 per cent of the inhabitants owned homes, that 88 per cent had electric light, 72 per cent had baths, 51 per cent had electric washers, 55 per cent had radios, 41 per cent had vacuum cleaners.

There are more families in America than in any other land that can afford to and do send their children to high school and college. In no other land do so many average families have the means to enjoy foreign travel. . . . The movie still attracts a weekly average attendance of 75,000,000. . . .

The percentage of our agricultural population who, despite deflation, are acquiring domestic comforts, conveniences, labor-saving devices, improved machinery, the use of better roads, is constantly increasing.

Today more than 700,000 farms are electrified, representing an increase of

400 per cent in eight years, and the total is being swelled rapidly.

In industrial communities hard manual toil is being steadily abolished by the introduction of machinery. Each American worker now has at his command five horsepower, a record not even remotely approached outside our boundaries.

The average working day a generation ago was ten to twelve hours. The standard in this generation is eight hours. . . . The work-week used to consist of six . . . days. Now it is five and one-half days, with the five-day week coming into vogue.

Never in the past was America so well equipped as it is today to resume an epochal forward march. Not only have we changed from a debtor nation to the greatest creditor nation on earth, not only have we vaster national wealth, not only have we an unprecedented supply of gold, but we are richer in experience, richer in in-

ventive bains, richer in scientific knowledge, richer in machinery, richer in productive facilities, richer in managerial skill, richer in discovered mineral and oil resources, richer in transportation facilities; . . . richer in every material wealth-creating product and process, richer in craftsmanship, richer in everything. . . . The country is all right. What we

need is less hysteria and more confidence and courage.

Guest (to country inkeeper): "Landlord, did you ever hear of the straw which broke the camel's back?"

Landlord: "Yeah. Why?"

Guest: "Well, you'll find it upstairs in that bed in room 17."—Missouri Pacific Magazine.

NEBRASKA BOYS EARN HONORS

Gold and Crafts Awarded Fisher Body Craftsmen's Guild Competition

OMAHA, (Special)—When 112 boy craftsmen from all parts of the United States and Canada gather in Detroit next month for the second annual convention of the Fisher Body Craftsmen's Guild, the State of Nebraska will be represented for the second successive year by Harry Pearson of 3311 W. St., Lincoln, and Hal Halstead of 6811 Minneluna St., Omaha, who carried off top honors at the state judging just concluded here. Each of the two will receive not only the trip, but \$100 in gold, and his model will be judged in the international competition for four university scholarships of four years each.

Second-place awards for the state went to Fritz Merting of 1547 N. 33rd St., Lincoln, and Stanley Novak of 1661 Burr St., Lincoln. Each of these boys will receive \$100 in gold, and his model will also be judged in the International competition for scholarships, though the boys will not attend the convention. Additional awards, ranging from \$15 to \$25, were made to the following Nebraska boys:

Louis Lundstrom of 1616 M. St., Tekama, John F. Hultquist of 621 Arthur St., Holdrege, Zellis C. Zeller of Broken Bow, Robert D. Seidel of Deshler, Gerald Nau of Fairburn, and Earl Petzold of Lynn. A similar list of awards is being offered in each of the 48 states, and in each of the seven Canadian Guild districts.

Dean C. Cook, of the Fisher Body Craftsmen's Guild, in charge of the Nebraska and Iowa judging, held here, voiced gratification at the high standard of craftsmanship achieved in the state this year. "Every boy who finished a model," said Cook, "has not only developed his manual skill, but far more important than that, has learned a lesson in perseverance which will stand by him all his life."
