

Continued from page 4

**PLEASANT DALE**

Young farm while Mr. and Mrs. Young and daughters, Marie, Ollie, and Mrs. Hazel Beckwith and daughter, Leona Fern, went to Central City to attend the funeral of Mrs. Young's sister, Miss Cora Owen, who died Thursday, August 4th. Mrs. Young will remain for a week, the rest returned home Sunday afternoon.

Mr. and Mrs. Gus Seger had a family reunion dinner Sunday. Those present were: Darwin, Harold, Minnie, Mr. and Mrs. Henry Seger, Mr. and Mrs. Vernon Keeney, Mr. and Mrs. Verne Beckwith, Mr. and Mrs. Ralph Beckwith and daughter, Myrlen. Miss Eileen Frohart and Rex Beckwith were guests.

Bennett Sanders spent Sunday at his home in O'Neill. He returned to his work Sunday evening at the Ralph Beckwith farm.

The charivari gang that were after Mr. and Mrs. Linus Howard while they were taking care of her folks farm, were unsuccessful in finding the young couple, although they were at the place all the time.

The heavy rains the latter part of last week brought the water up several feet in the river and J. B. Ryan's hay crews had some difficulty in crossing the river where they had been crossing at a shallow place.

Mr. and Mrs. F. J. Weber and children, Darlene, Dwayne and Shirley, of Long Pine, returned home Friday after a weeks visit at the Joe Winkler home. Mrs. Ralph Beckwith and Mrs. Henry Seger called at Mrs. L. G. Linville's Tuesday morning and got some apples.

Joe Winkler and F. J. Weber made a business trip to Norfolk Saturday, returning the same day.

Mrs. F. J. Weber and Mrs. Joe Winkler went to Stuart Wednesday to visit Mrs. Winkler's parents, Mr. and Mrs. George Weber and sister, Mrs. John Shald and family.

Clearwater Record: Last Wednesday night about 12 o'clock Ben Babcock, our night watch, arrested a couple of young fellows carrying a battery they had swiped back of Contois Garage. Ben threw them in over night and in the morning brought them up before Judge DeCamp who promptly fined them \$16. Their mother paid the fine and the judge suspended the 30 day jail sentence and patrolled them to the mother, she to be responsible for their good behavior. They were Holt county residents.

State Journal: Congressman Edgar Howard, of Columbus, led a group of northern Nebraska citizens Wednesday to ask Governor Bryan for paving of highway No. 20 from Sioux City part way to O'Neill, the northernmost of the three main east-west trunk highways across the state. Only a small stretch has been paved west out of South Sioux City. Besides Congressman Howard, leaders in the group were State Representative George M. Story of Plainview and Watson Prudy of Madison. Mr. Story said No. 20 is now carrying such a heavy traffic that the gravel will not stand up.

**HOLT COUNTY FARM BUREAU NOTES**

**Cutting Corn for Silage**

If corn for silage is cut at the proper stage it is not necessary to use very much if any water. The proper time to cut it for silage is when the corn is starting to dent and glaze over.

Trench silos will solve the feed problems on a number of Holt county farms this fall. A trench silo 10 feet wide at the top, 8 feet wide at the bottom, 8 feet deep and 40 feet long in the deep section, will hold about 100 tons of silage. This will feed about 20 head of cows and 20 head of yearlings for a period of 150 days.

Information on making trench silos can be secured from the Farm Bureau office. The county agent will be glad to assist any farmer in planning and laying out a trench silo.

**Live At Home**

Several thousand Nebraska farm women are enrolled in Extension clubs for fall and winter work despite the unfavorable economic circumstances, according to Mary Ellen Brown of the College of Agriculture Extension Service which sponsors the project.

Women in all corners of the state taking club work this year are attempting to study their household business in an effort to reduce expenditures. In explaining the project, "Live at Home," Miss Brown says the period of lowered prices has meant a diminished amount of cash in almost every home. The cash available must cover almost as many items as before and it seems that whatever the various members of the farm family may do to conserve the available amount of cash will be decidedly worthwhile, she says.

Women from practically every county in Nebraska are already en-

rolled in the project. They have met, selected two delegates or leaders to attend leader training meetings and have started on their actual club work. All of the local work is being sponsored by county Farm Bureaus over the state.

"Live at Home" project includes nine meetings for the farm women. During that time they are studying about gardening, canning and preserving of foods, home nursing, re-making old clothes, dairy products and home baking. Community achievement days in the spring will wind up the year's program.

Each club in the state is sending two leaders to the local leaders training meeting held monthly in each county. Extension Service specialists from the College of Agriculture and home demonstration agents have charge of the leader training meetings. Any club groups wishing to enroll may secure application blanks from the Farm Bureau office, or they can send in the names of their president and two project leaders, and the enrollment blanks will be made up in this office.

**Leafhoppers Attacking Vines**

A number of people have reported damage from leafhoppers. They are slender, delicate insects usually one-eighth of an inch or less in length, and vary from brown to pale green in color. They hop considerable distances when disturbed. A characteristic injury caused by the leafhoppers is a whitening and curling of the leaves, with dying of the edges. They are attacking grape vines and other climbing vines. Often times they damage potato, tomato, bean and strawberry vines.

The eggs are laid in the leaf tissue or stalk and two or more broods may be produced annually. Leafhoppers belong to the class of insects which live up the juice of plants and can not be treated with arsenicals such as paris green, or lead arsenate. Contact insecticides so applied as to surround the insects when leaping or flying from the plants is a most effective remedy.

The application of nicotine sulphate using a teaspoonful of nicotine sulphate in a gallon of water is very effective. A one-inch cube of hard soap should be shaved up and thoroughly mixed in the solution. If the spray draws together in drops when applied, more soap should be used.

Ordinary soap suds is a good spray for leafhoppers and plant lice. It should be made by dissolving a one-inch cube of laundry soap or a rounded tablespoonful of whale oil or fish oil soap in a quart of hot water. This must reach the bodies of the insects to kill them. On very tender plants it should be used half strength.

**Tomato Juice for Breakfast**

Home canned tomato juice may well take the place of orange juice for breakfast in Nebraska. Either will build good teeth, clear complexion, and good appetites. Use ripe red tomatoes. Wash and cut into sections. Simmer until soft. Put through sieve fine enough to remove seeds. Bring juice to boil, fill into hot jars. Add one teaspoon salt per quart of juice. Process five minutes in water bath, or eight minutes in an oven at 250 to 275 degrees. Seal the jars and store in a cool dark place.

To can tomatoes whole, select ripe tomatoes of medium size and free from blemishes. Dip them in boiling water long enough to loosen skins. Plunge into cold water for an instant. Remove stem end and skins. Pack into

jars as closely as possible. Add one teaspoon salt per quart. Fill with boiling water or strained tomato juice. Process 25 minutes in a water bath or 40 minutes in an oven at 250 to 275 degrees. Seal and store in a cool dark place.

Additional directions for processing and for canning other fruits and vegetables are included in Nebraska Extension circular 922, Home Conservation of Fruits and Vegetables. This bulletin may be procured at the Farm Bureau office in O'Neill.

**PROCEEDINGS OF THE HOLT COUNTY BOARD OF SUPERVISORS**

O'Neill, Nebraska, July 26, 1932.

Holt County Board of Supervisors met as per adjournment taken on July 6, 1932. Members present: Sullivan, James, McKim, Root, Skidmore, Stein and Steinhauser. Meeting called to order by the chairman. Minutes of previous meeting were read and, on motion, were approved as read.

**"I'm glad my mother had a Telephone last night!"**

An actual incident told to us by one of our customers, showing how one telephone call may be worth more than telephone service costs in a lifetime.

A 10-month-old baby may not understand how the telephone quickly brought a doctor to relieve him from suffering—but his mother says she knows what he would want to say if he did understand.

Once before in his short life this baby was seriously ill and it was the telephone that kept his mother in constant touch with the doctor and hastened his recovery.

Where there is illness, fire, accident, and you need help at once, you realize that nothing can take the place of the telephone.
