N PREPARATION for another major transfer of the government's huge gold reserve, secret orders have been issued in Washington for the rush construction of a subterranean vault in the center of Fort Knox (shown here from the air), an army post 31 miles from Louisville. Into the vault will be transferred a good portion of the billions in gold now held by the government in New York and Philadelphia. The structure will be built in continuation of the policy of moving precious monetary reserves away from vulnerable cities on the coast to more isolated inland territory.

DANNY FINDS A REFUGE

"Oh!" cried Danny, "Buster Bear is trying to catch me, and I don't know what to do."

"Come in here," replied Whitefoot promptly.

Danny didn't need a second invitation. He darted in just as Buster Bear reached the tree on the other side. Buster promptly tried again the trick by which he had so nearly caught Danny. He reached a great paw around the trunk of the tree and brought it down swiftly. But he was too late. There was no one under that big paw. Buster watched and listened, but he saw nothing and heard nothing. Then he walked around the

Now Buster Bear's claws are long and stout and when he sets out to dig he makes things fly. But Whitefoot the Woodmouse knew all about those great claws, and when he made that little round hole he made it right under the big roots of that tree. YOUNG "bandit" describing a criminal career which will put him behind bars probably for the best part of his life, announced that his whole "career," which included a number of robberies and hold-ups, had netted him only \$50.

The stigma of crime, a medium of harm to his fellow men, his life ruined-for \$50!

The comment is obvious that a similar amount of interest, enthusiasm and effort expended on constructive work would have brought this deluded young man at least a good living, peace, security, respect. And it might have brought him a good deal more. It might have brought him success, leadership, distinction.

It is the age-old story of trying to get something for nothing. And it is not only in the pursuit of crime that we find constant evidence that this does not pay, that it leads always to tragic failure. There are ways besides crime in which people try to get something

A Tough Old Bird Five Billions More? News of Hogs Submarines Wanted

Amos R. E. Pinchot, who has leisure and thinks, utters profound truth writing to one of the "pro-

fessors."

"Capitalism is a tough old bird. that will live a good deal longer than any of us will." Capitalism,

which means

government by organized dollars and industry, instead of organized soldiers, will last Arthur Brisbane longer than the

present generation, longer than this century. Capitalism is the new financial feudalism that replaced military feudalism. There is no reason why it should not last as long as military feudalism lasted, many centuries.

Senator Borah, one of the senate's able men, predicts that congress will sit until November 1. and that five thousand one hundred and twenty millions more will be appropriated for immediate spending. That would make about an even ten billions in extra appropriation for this year.

Two thousand one hundred and twenty millions of the money would pay the soldiers' bonus in "greenbacks," and three thousand millions would be used to take up mortgages on farms.

"Hogs sell up to \$10.10, best price since September, 1930." That comes from Kansas City-ten dollars and ten cents for a hog weighing one hundred pounds. That may not mean much to you; it means much to the farmers that raise hogs. It also has meaning for housekeepers that buy sausages.

For some mysterious reason, when pork prices go up 10 per cent sausage prices go up 100 per cent.

Rear Admiral Yates Stirling, Jr., commanding Brooklyn navy yard, ing instructions included. says America needs long-range submarines to protect our interests in the Pacific.

Since 1918, when sweet peace returned, wise Japan, according to SURE TO STATE SIZE.

Admiral Stirling, has built 64 submarines, including 27 of long range, each carrying six torpedo tubes, powerful guns, able to cross the Pacific and return without refueling. Japan has also a special fleet of eight submarines for placing destructive ocean mines, four of them able to operate 5,000 miles from their base. Each could place 45 bombs in the path of enemy ship-

Newell P. Sherman, choir singer, Boy Scout master, fell in love with a girl sixteen, admits that to make his way clear he upset a canoe, throwing the mother of his two children into the water, kept pushing her away from the boat until she sank and drowned. This young gentleman is 6 feet 4 inches tall, but the electric chair can doubtless be arranged to fit him.

You will hope that no tenderhearted parole board will say, "He ought to have another chance." One chance to drown the mother of your two children seems enough.

Rome reports Fascist excitement because "Japan assumes the role of Abyssinian champion."

A Fascist newspaper calls Japan "the enemy of Europe and America, dreaming of world conquest." That seems to be a keg of powder with only a spark lacking.

Scientists experimenting with guinea pigs take one or ten or a hundred guinea pigs, never all the guinea pigs at once.

College professors, union labor leaders, convinced of their ability to invent a better government, gentlemen who believe in no government at all, and other experimenters, should select a definite number of American guinea pigs for experiment, not practice on the 130,-000,000 all at once.

Miss Margaret McDermott, spin ster lady of Chicago, left \$25,000 for an old spitz dog. Many write to the executors saying they simply "adore animals," especially spitz dogs, and would like to take care of "Pet" in return for the income of \$25,000.

That interests men that leave large fortunes to daughters or sons. Fortune hunters from abroad are always ready to spend money left to daughters, and scheming ladies, foreign or native, are ready to help a young gentleman spend his inherited money, as recently illustrated in a certain Ryan case.

Good Samaritan Aids Helpless Birds

HEY were just three baby sparrows, in need of protection when I Frances A. Urban, fourteen-year-old high school girl, saw them flopping about helplessly in her back yard in Hollywood, Calif., and decided to befriend them. At her home, the girl placed them in a cage near a window. A day later she heard a flutter and saw a grown sparrow, then two, beating wildly against the screen. Suspecting the visitors were the birds' parents, she placed the cage in the yard and opened the door. One of the birds flew in with worms and fed them, daily.
