Model of the 200-Inch Telescope

After a long period of study, the design of the 200-inch telescope and dome of the California Institute of Technology has reached a point where preliminary sketches have been completed. The tube of the telescope, about 20 feet in diameter and 60 feet long, will weigh about 125 tons. This includes the 200-inch mirror, lying on a special support system at the lower end of the tube. It is estimated that five years will be required to complete this great telescope which will gather and focus light that started out from distant stars millions of years ago.
