Remember the good old days when a college professor was supposed to know a lot?

Tugwell's Waste Goes On and On
Spends 278 Million; Houses Far Short of Program; Payroll Huge.

Washington—When the District of Columbia court of appeals held that the President's transfer of relief funds to Prof. Rexford Guy Tugwell's resettlement administration was unconstitutional, it did not save the hundreds of millions of dollars of the taxpayer's money which have been spent by what one congressman has called "the most extravagant, the most unjustified and the most useless" of the New Deal alphabetical bureaus. (Neither did it put a stop to future spending by the RA, for the decision will be appealed to higher courts.)

Between May 4 of 1935 and March 23 of this year, Tugwell has received \$278,347,171, of which \$31,950,000, or nearly one dollar in every nine, has gone for "administrative" expense. Other expenditures: sub-marginal land purchases, \$44,120,328; subsistence homesteads, \$15,275,735; rural rehabilitation and resettlement, \$124,279,046; direct relief, \$16,169,354; suburban development, \$31,000,000, and land development, \$15,000,000.

Payroll Numbers 17,055.
 What started out as only a handful of executives in the RA has swelled to a payroll of 17,055. The payroll for administering the various units in 27 Washington buildings alone is \$25,062,985 a year. Sixteen executives are paid \$7,000 to \$9,000 annually; 41 from \$6,000 to \$7,000, and 55 from \$5,000 to \$6,000.
 Professor Tugwell determines the amount of land which the RA will purchase and the use to which it shall be put. In less than a year he has placed under option 10,020,630 acres of land and has purchased 8,583,840 acres.

Houses Fail to Rise.
 Tugwell has spent \$278,347,171, but few houses, comparatively, have ever been completed. In most cases the lands on which they are built are too poor to raise crops profitably and few families are attracted to move in. Still fewer industries are being moved to the projects. Where houses have been completed, walls are often cracking and roofs leaking already. Tugwell's payroll for labor alone is \$30,000 a day—enough to build ten houses a day—but less than ten houses a month are being completed.

Spending in Lucid Terms
 Washington—The \$11,001,083,884 spent by the Roosevelt administration up to the middle of May for industrial "pump-priming" and relief is nearly twice the amount of all the money in circulation in the United States.

We doubt whether the price of agricultural land will ever rise, so long as so many farmers seem so anxious to admit that farming is a failure.

international security. Without admitting this what will it do to our economic security?
 We hope that Secretary Hull doesn't do any more to lower the tariff on nuts. We have an oversupply in the United States right now.
 The United States is engaged in an impossible job. It is trying to write a tax bill that will not be a burden to the average consumer. It's just got to be a burden, one way or another.
