

SYNOPSIS

In the year 1785 Saul Pattern of Virginia came into the beautiful virgin country of the Big Sandy valley in Kentucky. Chief of the perils were the Shawnees, who sought to hold their lands from the ever-encroaching whites. From a huge pinnacle Saul gazed upon the fat bottoms and the endless acres of forest in its primeval quietude at the mouth of the Wolfpen, and felt an eagerness to possess it, declaring it a place fit for a man to LIVE in! Five years later he returned with Barton, his fifteen-year-old son, and built a rude In Saul's absence the Indians attacked Barton and wounded him so badly Saul was forced to return with him to Virginia. In 1796, when it was reasonably safe, Saul returned with his family and a patent for 4,000 acres, this time to stay. He added to the cabin, planted crops and fattened his stock on the rich meadows. Soon other settlers arrived. A century later, in the spring of 1885, we find Cynthia Pattern, of the fifth generation following Saul, perched on the pinnacle from which her great-great-grandfather had first viewed Wolfpen Bottoms. The valleys, heretofore untouched by the waves of change sweeping the Republic, are at last beginning to feel that restless surge. Her dad, Sparrel, and her brothers, Jesse, Jasper and Abral, have been converting the old waterwheeled mill to steam power.

CHAPTER I-Continued -2-

Now it was finally set up and adjusted, this evening it would be set in motion, and Cynthia was there on the ledge, by the overhanging bushes, to witness the triumph of her father. She was near enough to hear the talk of the onlookers who knew that this mad contraption of Sparrel's couldn't possibly work, and even if it did (which it wouldn't) the meal wouldn't be so good.

One group was particularly interested in the boiler where Jesse and Abral were working.

"He sure ain't aimin' to turn them big grist stones with that puny black lard kittle now you don't reckon."

"Don't look near big enough." "Who ever heard of a feller working a mill with a kittle of b'ilin'

"It sure beats me how it could." "What do you fellers know about a steam-engine when you never saw one in your lives, I don't reckon," Doug Mason said.

Cynthia, recognizing Doug's voice, liked him more because of the way

he had spoken. She heard Sparrel laugh at their with his work, inspecting the boiler as it began to exhaust little puffs of steam. Abral was putting more blue smoke curling over the mill was thinned into the air before it could reach the rock where Cynthia sat; but the gentle bite of its smell came into her nose.

She could feel light puffs of hot air on her face from the column set up from the boiler. Sparrel watched excitement in the crowd in the millyard as the boiler began to spank and sputter under the expansion. Then Sparrel tooted the whistle. She saw it first as a puff of vapor which melted instantly into a sound cavorted about. One of the Darten boys splashed across the creek to safety. The crowd moved back from

Sparrel was full of a great pride as he turned the steam into the cylinder of his new engine. It hissed and spewed, the piston began to move; then the belt jerked, the new faster than ever before; a monster new engine. from the outside had finally got into the mountains.

now pressing about the mill and down the chute into a sack.

"Well, now, I'll be dogged," the skeptical neighbor said. "Who'd ever study up a contraption like that to turn a millstone with, anyhow?"

"It runs all right, but it makes a sight of fuss about it," Cynthia said, and arose from the ledge where she sat. "I guess I better get now soon to start supper and the back now."

As she started down the path, she looked across the bottom to the weathered stone slab at the head of old Grandfather Saul's grave on the Cranesnest Shelf, and she felt that now to be buried with him.

Down the winding contours of the

Cranesnest Shelf. There was for Cynthia something intimate and old grown out of the very stuff of her

family's life. tom-land was united in the small tecture for that district. plot within the rails on Cranesnest Shelf where lay at rest the earlier makers of the land. Cynthia leaned forward with her chin in her left hand and her eyes on Stack Bottom, but she was looking at nothing when she wished.

en he was a man. Both of her sisters were gone. Lucy, the oldest of at the Pattern Landing; and Jenny, who was next to Jasper, already ers that had passed over Wolfpen, had two children and seemed miles away on the Horsepen Branch farm. to the yard. Julia was still in her But to Cynthia they were no farther away now than before their ing the earth with her hoe, not marriage because they had always working, but enjoying the smell of been of another generation from the soil, planning her beds, feeling herself, the youngest of the children, save Abral. Grandfather Saul tant to go back into the house Cynseemed as close to her as Lucy, perhaps closer. For she could recreate empty water pail on the bench by him and his sons to please her own fancy; could dress him in his old the well by the pear tree under the would take from their peg in the wall by the staircase landing, the end of the pole and to hear the chimneys. stretching out their long legs as far jostled overflow splashing against as she could reach, swelling out her imagination until it brought to life a man seven feet tall, a whole foot | well, higher than her own father, great family on this particular spot.

had always thought of him as living to the stove and laid on some dry there in a cabin instead of dead in a grave. She fell to thinking of his son, her Great-Grandfather Barton, with the knot in his neck, hollowing out a poplar log to lay Saul's body in and imagining it being borne up to this Shelf which he had selected for himself, while the great shadow of the Pinnacle continued leisurely to space off the hours on the sun-dial of the bottoms which had gone down the river into the great world and brought back a incredulity and watched him go on steam-engine to make smoke and roar because the valley was filling up with people.

"I reckon that's just what you'd wood under the fire-box; the pale do yourself though if you lived now instead of then; only it seems different somehow."

Then she forgot the smoke of the mill to fancy in the ancient stillness the cloud puff and sharp report of Saul's long flint-like rifle which now hung above the fireplace on the antlers of the first buck he had shot at the steam gage while Jasper and the mouth of Wolfpen in 1796. That Abral attached the belt. There was gun with its bullet-pouch and powder-horn which he had bought from Boone in the autumn of 1785 when they met at Pound Gap, made more human for Cynthia the incorporeal Saul of the poplar log. She tried to imagine Daniel Boone and Saul which roared in her ears. All the Pattern sitting around a camp-fire wood. As the stove grew warm horses, mules and oxen jumped and trading stories of their adventures against the cool damp of the April in the Big Sandy country when the Indians still held it.

> "I'll have to show you one day for it's not possible to tell you with just words."

Julia poured the yellow batter into the deep skillet and put it into the oven. Sparrel went out to the wash rock, while Cynthia set the table, thinking of her father and all the things he did that distinguished him in her mind from the other men along the creek and how they always thought his ideas wouldn't work. There was the drying kiln with a fireplace under it so they could dry fruit in cloudy weather and not have to hurry sheetfuls of drying apples into the house at the first sign of rain. "You'll spile your fruit that way, Sparrel; takes sun to dry apples." Now most of them had kilns. When he built the tanning vat, the bark shed, the lye pits, and used opossum oil to soften the fine leather, they said, "You'll sure spile those hides, Sparrel, if you put 'em in that hole with that ground - up stuff." Now he tanned most of their hides in his vat. And when he built the brick plant down by the clay barrow, they said, "You can't ever make that kind of buckskin breeches, handed down sheltering portico of the cellar clay hold together. Sparrel." Now through the generations, which she house. She leaned over the well they got brick from his kiln to put in place of the old cats-and-clay

She heard the three brothers coming in from the barn to wash for supper.

"Supper is a nice time. The dusk of evening begins to crowd the daylight out of the valley and force it body and everything from around the place into the spot where it's warm and the food is cooking."

Cynthia was up and down during the meal, waiting on her father and the boys with buttermilk and fresh hot corn bread while they talked of the big day at the mill, of the men who had come, of the plans for the spring's work in the fields: Abral still full of excitement, eating too fast; Jesse alert and interposing humorous comment; Jasper reserved and keeping silence; Sparrel in good spirits after his great success; Julia, still slender and beautiful with her smooth black hair parted in the middle and drawn back above her fair skin, crumbling the fresh corn bread into the stewed tomatoes and eating slowly, watching over the table and listening to her men.

"It made a real good run of meal, but I didn't get a very good do on the corn bread," she said, after her manner; but the bread was beautifully moist and flaky between the crisp brown crusts.

"You never made a better pone of corn bread in your whole life, I reckon," Sparrel said.

Julia was full of her pride be cause he said it, even though she knew he was complimenting her no more than the mill.

After supper while the boys were putting things in order for the night at the barn, and Julia was milking her cow and tending to the crocks in the milk-house over the spring, Cynthia was gathering the dishes and washing them in the big tin pan on the stove and Sparrel sat at his desk in the corner stretching his long legs and writing in his ledger. "He always puts everything down

in his books," Cynthia thought, watching him having his pleasure at the end of the day. "April 10, 1885 - Erected first steam - mill. Warm. Plenty of sun. Poplar Bottom ready to plow." The best part of him seemed to her to belong in that corner under the shelf of books: the old brown Bible with the family names in it; the complete files of the Franklin Almanac beginning with Number XX, 1838. A book of selections for reading aloud stood beside Duyckinck's Complete Shakespeare in one volume of nine hundred and sixty-eight double-column folio pages with a frontispiece of "OTHELLO relating his adventures." At the mantel end of the shelf was the worn two-volume history of the United States beginning with the discovery of America and ending with the conquest of Callfornia and a page picture of San Francisco in 1846.

ly think you have Begins "completed your education." You naven't. You have just begun it. The real school begins now that your time of study is over, and you go to work.

Then you begin to find out things for yourself instead of half listening to instructors and skimming through text books. It is meeting people, talking

with them, finding out what they have in their minds that really educates you.

If you are keen and observant, you can learn at least a little something from almost everybody with whom you come into contact.

Among these people you will meet with many surprises and perhaps with many disappointments.

But they are the people with whom you must live and work. You must study them and come to understand them. You must bear in mind that few of them are "gaited" as you are; that their ways are new to you, and that their minds work differently.

But you can't bother about that. It is your job to get along with them; to find among them those who will be your friends; to be wary of others who profess friendships that they do not feel, merely for the sake of getting something from you. Treat them as you would like to be treated.

You may differ with them in religion and politics, but you don't need to get messy about such things, and either hurt their feelings or arouse them to anger.

In this world Jew and Gentile, rich and poor, must live and work side by side.

If they have the gift of tolerance, and you have it too, there will be no trouble.

If you think they are bigoted and narrow minded, associate with them as little as possible. Remember that many people

you don't like and never could like have just as much right to up the mountains, bringing every- life in this world as you have.
