

Now it's a well known fact, boys and girls, that adventurers have adventures, but why is it nobody ever gives a thought to adventurers' wives? They have adventures too-particularly if they travel around with their husbands like Grace Stanley of Fairview, N. J.

Mrs. Stanley is the wife of the late Col. King Stanley, a traveler and adventurer of long standing. During the four years that she traveled with him, she says she had enough adventure to fill an encyclopedia. But the one that gave her the biggest thrill-and also the worst frighthappened down in the wild and woolly state of Texas in the spring of 1926.

Grace Stanley and the colonel were taking a trip by automobile from Texas to Shreveport, La. Just beyond Marshall, Texas, they ran into a severe storm-and when storms are severe down on the Texas plains, they're severe, and no mistake. This one was a combination of thunder, lightning, rain and hail The rain came down in sheets. There was no cover in sight, and nothing to do but go on.

They were getting close to the state line when the car came to a bridge spanning a deep cut through which ran the tracks of the K. C. and S. railroad. As they hit the end of that bridge, Grace heard a DEAFENING CRACK. A sudden flash of light almost blinded her. The car came to a sudden stop and the air was filled with a sulphurous smell. Lightning! Had it struck them? With her heart in her mouth, Grace raised her eyes.

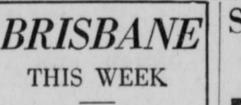

There were three people in the car-her husband and the driver in the front seat and Grace herself in the rear. The men, up front, were all right. Grace breathed a sigh of relief. But at the same time something inside of her was telling her to sit still-not to move even so

The Driver Got Out on the Running Board.

much as a single muscle. Without moving her head she turned her eyes to the right. The sight she saw there FROZE THE BLOOD in her veins.

The bolt of lightning had ripped away the entire corner of the bridge." The car was standing on three wheels, tectering precarlously over a fifty-foot chasm, its fourth wheel-the left rear one-hanging FAR OUT OVER SPACE.

24,720 Miles in 18 Days Some Ladies' Hats Gen. Butler's Peace Plan 12 Ladies Good and True H. R. Ekins, first-class newspaper man, has gone around the

globe by airplane, covering 24,720 miles in 18 days, 14 hours, 56 minutes. Such a trip seems wonderfully fast now. Soon it will seem wonderfully slow. Air progress is rapid. Because it was done scientifically, by machinery, the eighteen - d a y trip seems less

romantic than Arthur Brisbane the Nelly Bly seventy-odd day trip that beat Jules Verne's "Around the World in Eighty Days." Nelly Bly, clever newspaper woman, knew how to make it interesting, going out of her way to travel by elephant, camel, jinrickshas, etc. Flying around the world costs about \$5,000.

Some day some woman, let us hope, will balance her fashion budget, decide just what she wants to wear, and then wear it, as men have done, but the day is far away. These are some of the hats from which your wife, daughter, sister will choose this season:

Hats shaped like East Indian war shields; hats heavy in gold embroidery; flat pillbox turbans, gold braided; Russian style hats off the face, with tall tiara fronts; hats of Persian lamb and embroidered felt; small toques, dipped down front and back, covered with soft feathers, 'the military touch predominating.'

Why, do you suppose, do women take so much trouble to spoil faces and heads naturally beautiful? It cannot all be the fault of hatmakers.

Gen. Smediey D. Butler, retired fighting major general of the United States marines, asks the Women's Christian temperance union to start a campaign against drunken peace by working for a constitu-President or congress to send troops with gardenias. out of the country.

THE importance of period fash- | ions for evening this year means that they will be reflected in the gowns worn at many smart autumn and winter weddings. There is a quaintness about the early Victorian fashions that especially offers alluring possibilities to brides who would have a "picture" wedding scene.

THE FRONTIER, O'NEILL, NEBRASKA,

Young brides with slender figures can wear becomingly these demure gowns of Victorian inspiration in silk taffeta or heavy slipper satin. The lovely gown pictured creates romance and poetry for the modern wedding scene. This 1936 version of a Victorian wedding gown is interpreted in traditional ermine-white pure silk satin. The basque buttons quaintly down the back. The full sleeves give the broad shoulder efautomobile drivers, and also help fect that accents, by way of contrast, the slender girlish waistline. tional amendment forbidding the The bride carries a prayer book Of course one's bridal party must carry out the idea so the flower girl has a period look in a Victorian cream silk taffeta princess dress that is gored to fit at the waistline with a widely spreading skirt which, by the way, stresses the new length For the first time in history, New for little girls party dresses this season. This wee maiden ties a lavender silk ribbor in her hair and carries a bouquet of purple asters

and cream colored gladioli with a

she carries are purple and cream asters.

If one prefer that the attendants dress colorfully rather than keep strictly to cream satin, they may wear pert gowns in autumn hues of peau de soie or silk taffeta with puff sleeves and full skirts. As quaint and as "period" looking as if she had stepped form the fashion pages of a Godey appears a bridesmaid who is gowned in a frock of lavender silk taffeta with a tiny wine-colored silk velvet hat surmounted with three hyacinth blue ostrich tips. An armful of purple, rich red and cream asters adds to the color glory of the picture.

One thing is certain, whether she is a classic bride in traditional satin or in soft clinging fabrics, or a bride in quaint frock of Victorian or directoire inspiration, she will be dressed in silk of one type or another.

This year it is good style to have

Then the Car Started to Sag.

The men in the front seat weren't moving, either. They sat stiff and motionless, with grim, set expressions on their faces. Then, slowly, the car began to sag to the right-toward the broken, twisted wrecked side of the bridge.

There wasn't any time to waste. Quickly they talked the matter over-decided the only thing that could save them was to shift as much weight as possible to the left side of the car. Grace, who was in the rear seat on the right side, directly over the dangling wheel, couldn't move because the seat beside her was filled with luggage. It was up to the driver and the colonel to do the shifting.

The car settled a bit more. Grace held her breath as she felt herself sinking. The driver opened the door, slid over in his seat and got out on the running board. Both he and the colonel were big menboth of them weighed in the neighborhood of two hundred pounds-and Grace found herself breathing a prayer of thankfulness for that. In an agony of suspense she watched while the driver got out and her husband slid over in the seat to take his place behind the wheel.

"All this time," says Grace, "the car kept on settling down toward the right. It was probably only a minute or two, but it seemed like a thousand years. I hugged as close to the baggage on the left as I could, but still the car settled. It looked as if we were going over in splite of all our efforts."

Saved by Truck Driver With a Rope.

The colonel, too, was climbing out on the running board now-shifting his weight as far to left as possible. Still the car sagged, and there was nothing more they could do. If they stepped from the running board the car would go over. If Grace tried to move, it might furnish just the vibration needed to send the car off the bridge and down to the tracks fifty feet blow. It was a heartbreaking situation. Death was staring her in the face, and nobody dared to do anything about it.

But at that same moment help was in sight. A small truck shot around a corner from the opposite direction, and the driver saw what had happened. He stepped on the gas and came speeding toward recently to be on the verge of war.

Again, Grace was afraid to breathe. Would the vibration set up by the truck send them over the side?

But the driver of that truck had a lot of presence of mind. Also, he had a rope. He leaped from his seat with the rope in his hand, looped it around the front of the car and then made it fast to the far side of the bridge.

With the rope holding the car, Grace could get out. She and the colonel went around to the back of the automobile to join the truck driver, who was excitedly crying that nothing but a miracle had saved them. The follow was right, too. The lightning had curled up the ironwork of the bridge like so much straw. One of the curls had ripped of both right tires and completely ruined one side of the car. Another curl had caught under the car itself-and that was the only thing that had kept them from going over.

the skin.
