Good-Sized Chapel Made From Tree in California

The first Baptist chapel built in Santa Rosa, Calif., in 1873, and still standing, was constructed from a single tree. The tree was 18 feet in diameter and yielded 78,000 feet of lumber, of which 57,000 feet was clear of knots. A portion of the top of the tree was broken when it was felled, and this was made into shingles. The lumber for the church was valued at upwards of \$1,800 and some idea of the size of the church may be gained from the fact that the main auditorium is 60 feet by 37 feet, the parlor is 30 feet by 20 feet, and the pastor's study is 28 feet by 16 feet, while the tower is 70 feet high.

If you were to say the first bugle call of the day in the Army is "Reveille"—you'd be wrong. It's "First Call." But you probably know what cigarette gets first call with Army men—it's Camel. And Camel is the favorite with men in all branches of the service—Navy, Marines, Coast Guard, too. (Based on actual sales records from service men's stores.) And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.
