Hey Kids!

HERE'S HOW TO MAKE A SWELL KITE—

By following the directions at left, you can easily make a swell kite. But whether you make your own or buy one at the store, have fun but be careful . . .

AND FLY IT Safely

Kite flying is lots of fun and it can be safe too if you follow these rules:

- 1 KEEP KITES AWAY FROM ELECTRIC WIRES.
- 2 Don't use metallic string or wire for kite string.
- 3 Don't fly kites in damp weather.
- 4 Don't run across streets or roads when flying kites.
- 5 If kite becomes entangled in electric wires or trees near wires, DON'T attempt to get it down yourself. A KITE ISN'T WORTH TAKING A CHANCE ON GETTING HURT!

WHERE DO YOU FIT INTO THE WAR PICTURE?

Of Course, You Fit, and Are No Misfit!

Don't Get The Idea—

Even if you feel that you have been somewhat of a slacker and that you have taken life pretty much "as usual", it is not too late to turn over a new leaf. The war isn't won yet on either front. In fact, we are receiving more orders than ever before for bombs and shells. The armed forces are going to finish the job as quickly as possible, but they can't do it without the ammunition and without your help in making it. We desperately need additional workers now. A new shell line is being constructed; one of our bomb lines is undermanned; summer workers will soon be leaving after having done a great war job. Their places must be filled.

THAT is WHERE You Fit into the War Picture!

It's Not Too Late To Start Doing Your Part!
